## Distribution of Business Utilities Sales Tax, Estimated by Major Industry Groups

The table below displays estimates of the share and dollar amount of tax payments associated with the State's current sales tax on utilities purchased by businesses in various major industry groups. The estimates are made on the basis of the full current level of tax and a $1 \%$ tax basis.

| Industry | $\underline{\text { Share }}$ | $\underline{\text { Tax \$, 3.3\% }}$ | $\underline{\text { Tax \$, 1\% }}$ |
| :--- | ---: | ---: | ---: |
| Chemical Manufacturing | $21.6 \%$ | $\$ 48,300,000$ | $\$ 14,600,000$ |
| Transportation Industries | $14.5 \%$ | $\$ 32,500,000$ | $\$ 9,800,000$ |
| Wholesale \& Retail Trade | $11.7 \%$ | $\$ 26,200,000$ | $\$ 7,900,000$ |
| Financial Services | $9.4 \%$ | $\$ 21,000,000$ | $\$ 6,400,000$ |
| Professional \& Business Services | $6.8 \%$ | $\$ 15,200,000$ | $\$ 4,600,000$ |
| Hospitality \& Food Service | $6.6 \%$ | $\$ 14,700,000$ | $\$ 4,500,000$ |
| Metals \& Machinery Manufacturing | $5.5 \%$ | $\$ 12,300,000$ | $\$ 3,700,000$ |
| Health Care \& Social Assistance | $4.4 \%$ | $\$ 9,900,000$ | $\$ 3,000,000$ |
| Leisure \& Amusement | $3.3 \%$ | $\$ 7,300,000$ | $\$ 2,200,000$ |
| Natural Resources \& Mining | $3.1 \%$ | $\$ 7,000,000$ | $\$ 2,100,000$ |
| Food \& Beverage Manufacturing | $3.1 \%$ | $\$ 6,900,000$ | $\$ 2,100,000$ |
| Personal Services | $3.0 \%$ | $\$ 6,600,000$ | $\$ 2,000,000$ |
| Utilities \& Construction | $2.5 \%$ | $\$ 5,600,000$ | $\$ 1,700,000$ |
| Vehicles \& Transportation Equipment | $1.5 \%$ | $\$ 3,420,000$ | $\$ 1,040,000$ |
| Information Industries | $1.3 \%$ | $\$ 2,830,000$ | $\$ 860,000$ |
| Furniture \& Misc. Manufacturing | $0.7 \%$ | $\$ 1,600,000$ | $\$ 480,000$ |
| Educational Services | $0.6 \%$ | $\$ 1,440,000$ | $\$ 440,000$ |
| Electrical Equipment Manufacturing | $0.4 \%$ | $\$ 830,000$ | $\$ 250,000$ |
| Agricutural \& Forestry | $\underline{0.2 \%}$ | $\underline{\$ 400,000}$ | $\underline{\$ 120,000}$ |
| Total | $100.0 \%$ | $\$ 224,000,000$ | $\$ 68,000,000$ |

The estimates above were generated utilizing ratios of electricity and natural gas energy to total output for all private sector industries contained in the current version of the 70sector Louisiana economic and policy simulation model provided by Regional Economic Models, Inc., commonly referred to as the REMI model. These ratios ultimately reflect energy use by industry at the national level, and the underlying assumption of the table above is that firms in the state are similar in energy use to their nationwide industries.

Current state law imposes a $3.3 \%$ tax on business electricity and natural gas energy purchases, as well as a $3.8 \%$ tax on business purchases of steam and water. The tax dollars associated with steam and water purchases are a relatively small component of the total business utilities tax receipts (about 3.5\%), and are included in the allocation above on the basis electricity and natural gas energy purchases.
