## COMPARATIVE DATA REPORT ON MEDICAID

A Report Submitted to the

## FISCAL AFFAIRS AND GOVERNMENTAL OPERATIONS COMMITTEE

**Southern Legislative Conference** 

November 15-19, 2002

John R. Rombach, Legislative Fiscal Officer

Prepared by: Brian Crow, Research Analyst Louisiana Legislative Fiscal Office **Council of State Governments** 

John J. Hainkel Jr., President of the Louisiana Senate

Charles W. DeWitt Jr., Speaker of the Louisiana House This public document was published at a total cost of \$942.00 (\$4.71 per copy for 200 copies). This document was published for the Louisiana Legislative Fiscal Office, Post Office Box 44097, Baton Rouge, Louisiana 70804 by the Louisiana Senate, Post Office Box 94183, Baton Rouge, Louisiana 70804 in an effort to provide legislators, staff and the general public with an accurate summary of Medicaid Comparative Data for FFY 2001. This material was printed in accordance with the standard for printing by state agencies established pursuant to R.S. 43.31

#### IMPORTANT NOTE:

This public document was published without verified HCFA 2082 (MMIS) data for all 16 states in the SLC. The Centers for Medicare and Medicaid Services (formerly HCFA) was unable to provide 2082 (MMIS) data for FFY 01 to the Louisiana Legislative Fiscal Office (LFO) due to data processing problems encountered in a change over in state submission of data from "hardcopy" to "electronic" as required by the Balanced Budget Act of 1997. However, CMS was able to provide 2082 (MMIS) data for 11 of the 16 SLC states. Alabama, Georgia, Maryland, Oklahoma, and Texas provided state generated data necessary to complete the Section of the Comparative Data Report on Medicaid for FFY 01 that details recipients/expenditures by "Type of Service" and "Other Characteristics". FFY 01 statistics for these five states are projected using FFY 95-FFY 00 trends, State Annual reports, and state submitted data. The Louisiana Legislative Fiscal Office has revised the FFY 01 report to reflect revisions in 2082 (MMIS) data for FFY 99 and FFY 00 based on verified CMS 2082 (MMIS) data for all 16 SLC states. CMS currently is uncertain as to when verified data will be available for the five states for FFY 01.

Additionally, state means of financing data has been modified to reflect <u>actual</u> state funds (reported on HCFA 64) that were obligated to financing the Medicaid Program. Previous versions of the Medicaid CDR reported projected funds from HCFA 37.

Note: HCFA 37 data is used to project Total Medicaid expenditures and Disproportionate Share payments for the two federal fiscal years beyond the actual data for current and prior years federal fiscal year in the report. In this year's report, HCFA 37 data is shown under FFY 02 and FFY 03.

# **SUMMARY**

#### INTRODUCTION

This report includes statistical tables and a summary of key findings based upon questionnaires distributed to each member state in the Southern Legislative Conference. This survey was initially conducted in 1992 and presented to the Second Congressional Summit on Federal Mandates in Washington, D. C., on April 29, 1992. Subsequent surveys have been presented each fall to the Fiscal Affairs and Government Operations Committee of the Southern Legislative Conference.

The format of the survey has been modified in an effort to present a meaningful amount of information without overwhelming the reader with excessive data. Data prior to FFY 95 has been removed from the report, but is still available upon request.

The assistance of legislative staff in each state and Medicaid agency staff that completed the questionnaires is greatly appreciated. Staff of the Centers for Medicare and Medicaid Services (formerly the Health Care Financing Administration) also provides invaluable assistance each year by locating and forwarding the information needed to complete this report. Thanks as well to several co-workers who assisted with preparation of this report: Gordon Monk, Willie Marie Scott, Carolyn Nicklas, and Jean Pederson. Thanks are also given to David W. Hood, Secretary of the Louisiana Department of Health and Hospitals, and Bill Perkins, Executive Officer of the Louisiana Department of Health and Hospitals for their advice.

Comments, questions and suggestions concerning this report will be welcomed.

#### BACKGROUND

Medicaid (Title XIX of the Social Security Act) is a program of medical assistance for impoverished individuals who are aged, blind, or disabled, or members of families with dependent children. Medical benefits for needy individuals are provided based on a division of state and federal responsibilities. The federal government establishes regulations, guidelines, and policy interpretations describing the framework within which states can administer their programs. The nature and scope of a state's Medicaid program are specified in a state plan that, after approval by the Department of Health and Human Services, provides the basis for federal funding to the state.

Medicaid is a federal entitlement program established with the 1965 Title XIX amendment to the Social Security Act. This program provides medical assistance to certain individuals having low incomes or resources. The Medicaid programs are jointly funded by the federal and state governments and are designed to assist states in providing access to health services to eligible individuals. Within broad guidelines established by the federal government, each state: 1) administers its own program; 2) establishes its own eligibility standards; 3) determines the amount, duration, and scope of services; and 4) sets the reimbursement methodology for these services. As a result, Medicaid programs vary from state to state and may do so within states over time.

Funding is shared between the federal government and the states, with the federal government matching state contributions at an authorized rate between 50 and 83 percent, depending on the state's per capita income. The federal participation rate is adjusted each year to compensate for changes in the per capita income of each state relative to the nation as a whole.

Federal requirements mandate the provision of certain services by any state participating in the Medicaid Program. These services include: inpatient and outpatient hospital services; prenatal care; vaccines for children; rural health services; lab and x-ray services; skilled nursing services; home health care for persons eligible for skilled-nursing services; pediatric and family nurse practitioner services; nurse mid-wife services; physician services; family planning; federally-qualified health center services; and services for the early and periodic, screening, diagnosis, and treatment (EPSDT) of those under age 21. States have considerable latitude about the scope of each of these services even though they are mandated.

In recent years federal mandates also expanded eligibility. The Omnibus Budget Reconciliation Act of 1989 (OBRA 1989) mandated expanded coverage of pregnant women and children with incomes at or below 133 percent of the federal poverty level. This change in eligibility to extend coverage to those whose incomes exceed the federal poverty level represents a departure from the traditional link between Medicaid and the "welfare" system.

Historically, eligibility for Medicaid had been linked to actual or potential receipt of cash assistance under the AFDC/TANF or SSI programs. Thus, eligible persons had to meet the requirements of the cash assistance programs in terms of age, blindness, disability, or membership in a family with dependent children. State Medicaid programs had, at a minimum, to cover all categorically needy persons: those who received AFDC/TANF assistance and most who received SSI. Eligibility also required that income and assets satisfy certain criteria.

Now, with passage of the Personal Responsibility and Work Opportunity Act of 1996 (Welfare Reform Bill), the automatic link between AFDC recipients and their ability to receive Medicaid benefits have been completely severed. The Welfare Reform Bill amended Title XIX to read that any reference to eligibility for AFDC/TANF benefits shall be interpreted as this relationship existed as on July 16, 1996. A state may choose to modify this relationship in three ways:

- 1) lower its income standard, but not below that level applicable under the state's AFDC state plan as of May 1, 1988;
- 2) increase income or resource standards, and medically needy income levels, by an amount not to exceed the CPI; and
- 3) use income and resource methodologies that are less restrictive than those used under the state plan as of July 1, 1996.

The federal legislation retains existing Medicaid law regarding transitional assistance. Families losing eligibility for cash assistance as a result of increased child support will receive four months of transitional Medicaid benefits. Those losing cash assistance due to increased earnings will receive twelve months of Medicaid benefits. States will have the option to terminate medical assistance for persons denied cash assistance because of refusal to work. Pregnant women and minor children, however, continue to be protected under OBRA 1989. Additionally, children who lost SSI eligibility due to the change in the welfare reform law will have their Medicaid eligibility grand-fathered in. However, no new individuals may qualify for this coverage.

States have the option, as of January 1, 1997, of denying Medicaid coverage to persons who are legal residents but not citizens. New immigrants will be automatically barred for five years after entry. Thereafter, states may offer coverage, but only under certain provisions. However, there are certain exceptions for persons who have worked for forty (40) quarters in covered employment, or served in the military. Additionally, no state may deny coverage of emergency medical services to either illegal or legal aliens.

The Balanced Budget Act (BBA) of 1997 (P.L. 105-33), which was signed by the President on August 5, 1997, continued the trend of congressional action to control growth in Medicaid. This act is projected to produce gross federal Medicaid savings of \$17 billion over the next 5 years and \$61.4 billion over the next ten years (FFY 97 to FFY 2007). Although there are some provisions for increases in Medicaid spending, the net effect of the legislation will be federal Medicaid savings of \$7.3 billion over the next five years and \$36.9 billion over the next ten years—the most significant reduction in federal Medicaid spending since 1981.

The initial projections related to cost savings as a result of the passage of the BBA 1997 have turned out to be grossly understated. Revised estimates from the Congressional Budget Office indicate that Federal health care spending for Medicare, Medicaid, and State's Children's Health Insurance Program (SCHIP) is anticipated to be reduced by more than \$226 billion--approximately \$123 billion more than originally projected.

In an effort to reverse some of the negative impact of the BBA 1997, the U.S. Congress passed the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act (BBRA) of 1999 (P.L. 106-113). The act contains numerous provisions to make corrections and refinements in all three programs. The majority of the revisions relates to the Medicare program and is designed to correct large cuts imposed on all Medicare providers--especially hospitals and long-term care facilities. For the Medicaid program, the BBRA amends Title XIX to: 1) increase DSH allotments for the District of Columbia, Minnesota, New Mexico, and Wyoming; 2) remove the fiscal year limitation on certain transitional administrative costs assistance; 3) modify the phase-out of payment for Federally qualified health center services and rural health clinic services based on reasonable costs; 4) provide for parity in reimbursement for certain utilization and quality control services; 5) eliminate duplicative requirements for external quality review of Medicaid managed care organizations; 6) make the enhanced match under SCHIP inapplicable to DSH payments; and 7) provide for the optional deferment of the effective date for outpatient drug agreements.

Additionally, the BBRA of 1999 reallocated funding for SCHIP, effective October 1, 2000. The total amount of federal SCHIP funding allotted to the sixteen states in the SLC was \$1.734 billion (down \$67 million from FFY 98) for FFY 00; states would have been required to provide \$621 million (down \$19 million from FFY 98) in state matching funds to utilize all available federal dollars. As of September of 1999, all of the states in the SLC had HCFA approved plans to participate in CHIP, although many of them did not draw the full federal allocation available. **Table 1** and **Chart 11** provides the total amount of federal dollars allocated to each state in the SLC and the amount that each state plans to utilize annually.

#### **METHODOLOGY**

The purpose of this report is to provide legislators and staff in each state with a reference document that can be used to compare Medicaid spending in a particular state to others throughout the southern region. The first report in this series was published in April 1992 for the Second Congressional Summit on Federal Mandates. That survey utilized data collected from each state on Medicaid program expenditures for state fiscal years. Since then the surveys have used data reported by each state to the federal government for federal fiscal years (October 1-September 30).

The Centers for Medicare and Medicaid Services (CMS) collects voluminous data on state Medicaid programs on HCFA Forms 37, 64, and 2082 (MMIS). Since each state follows the same report format and utilizes the same definitions and instructions, the information on these forms is the most accurate and consistently available. There are, nevertheless, certain inconsistencies that are introduced because of differences in interpretation about recipient, payment and service definitions. Whenever we are aware of such inconsistencies, we attempt to adjust for them when making comparisons among states. One should therefore exercise caution when comparing state expenditures for some services. For example, one state may include payments for rehabilitative services under "clinic services" while another may classify such payments as "other care."

A questionnaire was sent to each of the 16 states in the Southern Legislative Conference. Each questionnaire included several pages of data about the state taken from the HCFA 37, 64 and 2082 reports submitted by the state to CMS. States were asked to verify the accuracy of this data, to provide explanations of extraordinary growth in recipients or payments and to supply certain other information, such as levels of disproportionate share payments, methods of state financing, recent state initiatives, etc.

The data collected from the federal reports and from the states has been organized into a "Medicaid State Profile" for each state. These include multi-year histories of total Medicaid spending as well as recipient and payment data for major eligibility and service categories. Information on provider taxes and eligibility criteria is also included. Each profile contains charts comparing that state to the SLC average in terms of annual payments per recipient and the number of recipients per 100,000 population. As a supplement to state responses regarding program characteristics and initiatives, information was included from a publication, *Major Health Care Policies: 50 State Profiles*, 2001; published by the Health Policy Tracking Service in January of 2002. Key demographic and poverty indicators were obtained from *Health Care State Rankings 2001 Health Care in the 50 United States* and *State Rankings*, 2001: *Statistical View of the 50 United States*. Information on the Balanced Budget Act was included from a publication, *Overview of the Medicaid Provisions in the Balanced Budget Act of 1997*, *P.L. 105-33*, *Andy Schneider*, *and September 1997*. Information on the Balanced Budget Refinement Act of 1999 was included from a summary publication provided by the Government Printing Office website.

A large portion of this report is derived from HCFA form 2082 (MMIS), which provides detailed recipient and expenditure data by type of service and by other characteristics (maintenance assistance, basis of eligibility, age, race,

and sex). For FFY 01, CMS was able to provide 2082 (MMIS) information to the LFO on 11 states. Alabama, Georgia, Maryland, Oklahoma, and Texas were unable to provide complete 2082 data. All 16 states are included in the FFY 01 CDR, but state annual reports and state submitted data has been incorporated into the 5 state profiles for the ones that were unable to provide complete 2082 (MMIS) data. Once verified 2082 (MMIS) data is received for all 16 states in the SLC from CMS, a second version of the report could be issued if the CMS data is significantly different from that in the initial version of the CDR for FFY 01. All of these states expressed a willingness to assist the LFO in the process, however, for various data processing and workload demands were unable to do so.

It is of importance for the reader of this report to be aware of the changes from all previous versions of the Medicaid report. From FFY 92 to FFY 98, all HCFA 37, 64, and 2082 data was complete and used to make all comparisons in the report. For FFY 99, only HCFA 37 and 64 data were used for all 16 states; 4 states (Maryland, Missouri, South Carolina, and Texas) were unable to submit 2082 data and were omitted from all type-of-service line item comparisons. For FFY 00, the 5 states (Georgia, Maryland, Missouri, Tennessee, and Texas) that were unable to submit 2082 (MMIS) data were completely omitted from the report. For FFY 01, all comparisons that follow are made using HCFA 37, 64 and 2082 (MMIS) for the 11 states that had CMS verified data; the other 5 state comparisons are made using state annual report (Alabama, Oklahoma, and Texas) data and state submitted (Georgia and Maryland) data.

In the FFY 01 CDR, revisions have been made to FFY 99 and FFY 00 state profiles based on 2082 (MMIS) data recently approved by CMS. When evaluating state and SLC performance using the Medicaid CDR, it is important to realize that CMS is still in the process of eliminating computer and state data submission problems in their "new" system.

#### MEDICAID SPENDING IN THE SOUTHERN REGION

The rapid rate of growth in Medicaid spending which occurred during the late 1980's and early 1990's began to decline by FFY 94 in the 16-state southern region. Since that time, the growth rate has been variable; however, the trend is more toward controlled growth. Total actual Medicaid payments (administrative costs excluded) for the 16 SLC states for FFY 01 were \$69.7 billion, an increase of \$8.1 billion over the FFY 00 level of \$61.6 billion. Therefore, the growth rate from FFY 00 to FFY 01 was 13.2%. This is the second consecutive year of double digit increases in total Medicaid spending—FFY 00 increased by 10.0% from FFY 99, and indicates a continued upward trend when compared to the 6.5% increase from FFY 98 to 99 (see "Southern Region Medicaid Profile"). It is also important to note that prior to FFY 00, the last year of double-digit growth was in FFY 95 (10.5%).

Total spending for FFY 02 is projected at \$79.3 billion, administrative costs excluded, which is an increase of approximately \$9.6 billion, or 13.9% over the \$69.7 billion for FFY 01. Total spending for FFY 03 is projected at \$84.0 billion, or 5.9% over the \$79.3 for FFY 02. The annual rate of change projected over the entire eight-year period from FFY 95 to FFY 03 is 7.3% percent.

The slowdown that occurred in the rate of spending from 1993 to 1995 was due, in part, to the fact that the major mandates levied by Congress were implemented prior to this time and significant new mandates have not been enacted. Also, cost containment measures instituted by the various states, including the implementation of selected waivers for state Medicaid populations had contributed to controlling the growth in regional Medicaid spending during this time period. The net result was that growth from FFY 95 to FFY 96 was less than 1%. Actual growth figures for FFY 01 (13.2%), and projected FFY 02 (13.9%) and FFY 03 (5.9%), indicate that Medicaid spending may experience a pattern of significant growth, at least by health care standards, for the next several years. Furthermore, it is highly probable that projections for FFY 03 will be revised upward as this has been the pattern for the last five federal fiscal years.

It appears that rapid growth peaked in FFY 95. During the early 1990's several factors contributed to the rapid growth in Medicaid spending:

- First, program enrollment increased significantly, mainly due to federal mandates which directed states to expand coverage to pregnant women and children with family incomes at or above the federal poverty level. Such mandates had a major cost impact in southern states, which tend to have large indigent populations and a limited ability to finance health care programs at the high levels found in other parts of the nation. The number of Medicaid recipients in southern states grew from 13.9 million in FFY 95 to 16.7 million in FFY 01 (20.4%).
- Second, medical inflation has historically accounted for 50% of total growth.

- Third, other factors include higher utilization rates (due, in part, to federal mandates such as those calling for more thorough screening of school age children), the targeting of specific populations (AIDS patients, drug-dependent newborns) and higher payments to certain providers.
- Fourth, states have utilized creative methods to find the revenues needed to pay for Medicaid programs which in many cases have quadrupled in size over the past seven years. These include widespread use of provider taxes, disproportionate share payments and intergovernmental transfers.

Beginning in FFY 95, the ability of states to benefit from creative financing mechanisms was sharply reduced (the Waxman amendments to OBRA-93). In August of 1997, Congress changed Medicaid in three ways: 1) Repeal of the Boren Amendment, which fueled mandatory inflation payments for inpatient services, nursing homes, and community health centers; 2) abolished the necessity for states to obtain a waiver in order to institute Medicaid managed care programs; and 3) provided a decreasing cap on disproportionate share allotments to the states. It is expected that the aggregate impact of these congressional efforts will continue to control the growth of the Medicaid program.

Total Medicaid expenditures in the 16 Southern Legislative Conference states are illustrated in Chart 1. This chart divides Medicaid dollars spent by eligibility, which include the following categories: aged, blind, or disabled (65 and older), Children, Foster Care Children, Adults and Other Title XIX Recipients of unknown eligibility status. By far the greatest amount of Medicaid dollars is spent on those who are aged, blind, or disabled (67.7%). Expenditures for Children were next, accounting for 17.1% of the payments. The remaining classifications of Adults (11.0%), Foster Care Children (1.7%), and unknown (2.5%) make up the balance (15.2%). The total amount of Medicaid payments in the SLC for FFY 01 was \$60,715,333,787. This is an average annual increase of approximately 7.8% per year over the seven-year period from FFY 95 to FFY 01.

The total number of Medicaid recipients in the 16 states was 16,733,139 during FFY 01 as compared to the FFY 95 number of 13,902,531 recipients, or an annual increase of 3.1% per year. Chart 2 provides a percentage distribution of these recipients by the same eligibility standards as Chart 1. The greatest number of Medicaid recipients in the southern region was Children (48.7%). The aged, blind, or disabled followed with approximately 27.4%, while adults represented 18.3% of the total number of recipients. The balance of 5.7% is distributed among foster care children (1.1%) and unknown status (4.6%). The average payment per recipient for all Medicaid services in the 16 states was approximately \$3,628. This is an increase of \$275 from FFY 00 to FFY 01 and approximately a 4.5% annual increase from FFY 95.

Aged, Blind, Disabled 67.7%

#### STATE COMPARISONS

The next few pages contain direct comparisons among the 16 SLC states relative to spending levels and recipient levels. These comparisons include measures of per capita expenditures, expenditures per recipient and recipients per 100,000 population, as well as information on payments for services and on administrative costs. These are included only to indicate broad trends and demonstrate gross levels of spending and eligibility in each state. They should be used with caution when comparing state programs in terms of recipient coverage, cost effectiveness or level of effort. Charts cited below can be found at the end of this summary.

Per Capita Expenditures. Medicaid per capita spending in the 16-state southern region has increased from \$503 in FFY 95 to \$689 for FFY 01. States with high numbers of recipients per unit of population combined with a high level of payments per recipient rank high in per capita spending. As shown in Chart 3, per capita spending for FFY 01 ranges from \$445 in Virginia to \$990 in Tennessee. All other SLC states ranged from \$555 to \$976. Tennessee has increased per capita expenditures by \$50 (\$940 to \$990) from FFY 00, and now has the highest per capita expenditure level (\$990) in the SLC. Tennessee had an increase in population of approximately 256,486 (4.7%) during FFY 01 coupled with an increase in total Medicaid expenditures of approximately \$525 million (10.5%). Virginia maintained its position as the state with the lowest average per capita expenditure, reporting an average of \$445 per person (35.4% under the SLC average of \$689). This is due to the fact that: 1) the state's population increased from approximately 7.08 million to 7.19 million (1.5%); 2) total Medicaid expenditures increased from \$2.73 billion to \$3.04 billion (11.3%) and; 3) only 8.1% of the total population (43<sup>rd</sup> in the U.S.) has incomes less than the FPL (\$15,020 for a family of three for FFY 01).

<u>Payments per Recipient</u>. Annual payments per recipient for the southern region have increased from \$2,787 in FFY 95 to \$3,628 in FFY 01, an overall increase of 4.5% per year. Payments per recipient for FFY 01 range from \$2,534 in Tennessee to \$5,375 in Maryland. (See Chart 4). Since most states report disproportionate share payments on Form 2082 (MMIS), such payments are excluded from all regular Medicaid claim payment comparisons.

Expenditure per recipient comparisons should be viewed with caution unless used in conjunction with a specific well-defined service. We have chosen five of the largest and, hopefully, best-defined services for inclusion here: inpatient hospitals, skilled and intermediate care nursing facilities, intermediate care for the mentally retarded, physician services and prescription drugs. Each of these services represents a large part of a state's Medicaid expenditures and each has been an area of rapid growth as well. Payments for these five services represent approximately 62% of all Medicaid payments in the region for FFY 01, compared to 62.3% for FFY 00.

•Payments for general hospital inpatient services in the region have increased from \$8.5 billion in FFY 95 to \$9.5 billion in FFY 01, an annual increase of 2.0%. These payments represent on an average 15.6% of each state's Medicaid payments. If all disproportionate share payments were included in these figures, the growth rates and the share of total spending on hospitals would be significantly greater. The accompanying chart excludes all such payments that have been included on the HCFA 2082 (MMIS) in order to make consistent comparisons.

The total number of recipients for inpatient services increased at a 0.2% annual rate, from 2.28 million in FFY 95 to 2.31 million by FFY 01. The SLC average for annual payments per recipient for inpatient services has increased from \$3,698 in FFY 95 to \$4,135 in FFY 01, an annual growth rate of 1.9%. Payments range from \$2,575 in Arkansas to \$6,848 in Maryland. Again it should be noted that these figures do not include disproportionate share payments. (See Chart 5)

- •Payments for skilled and intermediate care nursing facilities grew from \$8.29 billion to \$10.8 billion during the period FFY 95-01, an annual growth rate of 4.6%. The average share of a southern state's Medicaid budget devoted to these services has fallen from 21.4% to 18.0% during the period. The number of recipients utilizing these services decreased at a -0.6% annual rate, from approximately 608,000 in FFY 95 to 587,000 in FFY 01. However, the payment per recipient during the period increased by 5.2% annually in the southern region, from \$13,640 to \$18,468. Average annual payments ranged from a low of \$13,779 in Florida to a high of \$23,712 in West Virginia. (See Chart 6)
- •The cost of intermediate care for the mentally retarded (ICF-MR) increased from \$2.84 billion in FFY 95 to \$3.23 billion in FFY 01, an annual growth rate of 2.2%. SLC states applied an average of 5.3% of their expenditures to this service in FFY 01, down from 7.3% in FFY 95. This service experienced a decline in recipients from approximately 50,857 in FFY 95 to 44,592 in FFY 01, a 12.3% decrease during the seven-year period. The average cost per recipient has continued to increase approximately 4.4% annually, and has increased from \$55,799 to \$72,436 during the period FFY 95-01. Average payments range from \$55,061 in Texas to \$94,263 in Maryland in FFY 01. (See Chart 7)

- •The cost of physician services increased from approximately \$3.68 billion in FFY 95 to \$4.21 billion in FFY 01, an annual rate of 2.3% per year. The number of recipients of these services also decreased from more than 9.62 million in FFY 95 to 9.41 million in FFY 01, an annual rate of -0.4% per year. For FFY 01, the number of recipients increased from FFY 00 by approximately 313,000 (9.09 million to 9.41 million). Average annual payments per recipient in the region experienced growth of about 2.6% per year, from approximately \$382 in FFY 95 to \$447 per year in FFY 01. Payments per recipient vary widely from \$218 in Missouri to \$571 in Mississippi for FFY 01. (See Chart 8)
- •The cost of providing prescribed drugs grew 18.0% per year from about \$3.66 billion in FFY 95 to \$9.86 billion in FFY 01. Recipients increased 0.4% annually from 9.19 million in FFY 95 to 9.41 million in FFY 01. The regional average payment per recipient grew from \$398 in FFY 95 to \$1,047 in FFY 01, an average growth rate of 18.0% per year. From FFY 00 to FFY 01, payments in the SLC for prescription drugs increased by 23%, \$8.04 billion to \$9.86 billion. States range from a low of \$698 per recipient annually for prescription drug costs in Georgia to \$1,440 in Missouri. For FFY 01, all SLC states experienced increases in payments for prescribed drugs. Of the 11 states that CMS provided 2082 (MMIS) data and the 5 states that provided state data, Mississippi and South Carolina had the largest increases, while Virginia and Georgia had the lowest increases. Payments in Mississippi increased from \$370 million in FFY 00 to \$568 million in FFY 01, or \$197 million (53.3%); and payments in South Carolina increased from \$385 million in FFY 00 to \$439 million in FFY 01, or \$36.7 million (9.6%); and payments in Georgia (projected) increased from \$539 million in FFY 00 to \$602 million in FFY 01, or \$63 million (11.7%). (See Charts 9A, 9B, and 9C)

<u>Recipients per 100,000 Population</u>. The number of recipients per 100,000 population increased during FFY 95-01 from 14,116 to 15,804. According to this indicator, the highest state was Tennessee with 27,910 per 100,000 population and the lowest was Virginia with 8,603. A state's rank on this scale is influenced by how liberal its eligibility criteria are for Medicaid and children in low-income families. (See Chart 10)

<u>SCHIPS Allocation per State</u>. All 16 states in the SLC have submitted SCHIP plans to HCFA. As of September 3, 1999, all 16 states had approved plans. Under the provisions of the legislation that created SCHIPs, states have the option of expanding Medicaid, designing a state plan, or doing a combination of both. In the SLC, 6 states have opted to expand Medicaid, 3 states have designed a state plan, and 7 have combined Medicaid expansion with a state-designed plan. Of the \$1.69 billion federal allocation for the 16 SLC states for which data is available in **Table 1**, \$890.4 million (52.7%) has

been requested to fund the various state SCHIP plans. Florida and Texas topped the federal allocation in the SLC with \$220.2 million and \$452.5 million, respectively. Florida utilized the largest portion of available federal funding--\$122 million (55.1%); Texas utilized \$229.7 million (50.8%) for SCHIP. West Virginia was allotted the fewest SCHIP dollars in the SLC, \$21.2 million and utilized \$15.0 (71.1%). Overall, SLC state movement with the SCHIP initiative appears to be cautiously growing after a slow start. For the reported SLC states, 2 are using 20% or less of the total program allotment, 2 are using between 21% and 40%, 4 are using between 41% and 60 % and 6 are using over 60%. (Table 1 and Chart 11)

^Some SLC states are accelerating coverage for 15-18 year olds to 100% of poverty.

Coverage of this group is mandated to 100% of poverty on a phased-in basis under Title XIX.

Once phased-in under Title XIX, expenses for this age group will no longer be covered under Title XXI.

States that exceed 100% of their annual program allotments will be "carrying forward" prior year balances to finance their programs.

\*Percentages refer to Total Program Projection as a percent of Total Program Allotment through FFY 01.

#### MEDICAID GROWTH FACTOR ANALYSIS

Payment data from the HCFA 2082 (MMIS) report was adjusted for inflation using the implicit price deflator for medical care published by the Bureau of Economic Analysis of the U.S. Department of Commerce. **Table 2** indicates that inflation accounts for about \$9.19 billion or 41.8% of the \$22.0 billion in nominal growth for the period FFY 95-01 for the entire 16-state region. Inflation-adjusted growth (or growth in real 1995 dollars) is estimated at \$12.8 billion during this period. On a region-wide basis, the number of Medicaid recipients increased 20.4% from 13.9 million in FFY 95 to 16.7 million in FFY 01. Adjusted payment data (which excludes disproportionate share payments to hospitals) plus recipient data were used to construct a Medicaid growth index in order to show which factors are primarily responsible for the growth in Medicaid payments. Charts and tables cited below can be found at the end of this summary.

**Table 3** provides a growth index that shows the relative contribution to overall payment increases of (1) enrollment and (2) the combined effect of policies governing reimbursement and utilization. Index values for "Enrollment" indicate the inflation-adjusted cost effect of covering additional recipients that entered Medicaid coverage during this period.

Chart 12 and Table 3 show the estimated dollar impact of the two growth factors on each state. Clearly, enrollment is the dominant factor throughout the region, accounting for \$8.3 billion (65%) of total growth (\$12.8 billion). Reimbursement and utilization policies accounted for \$4.5 billion (35%), reflecting state emphasis on the controls and restrictions in Medicaid payments.

Chart 13 reflects the values for "Reimbursement and Utilization Policies" and shows the combined effect of the amount paid for services in excess of (or below) medical inflation, plus increases or decreases in the utilization of services by recipients. [Information reported is not adequate to isolate the effects of reimbursement and utilization, respectively, so these variables are combined.] States with positive values for this factor show varying increases in average payments per recipient, a result of either an increase in reimbursement levels above normal medical inflation or an increase in the utilization of services by recipients or both. Conversely, states with negative values for this factor were able to contain costs during the period by imposing or continuing restrictions on (1) the amount and type of services which recipients may use or (2) the level of reimbursement paid to providers for services or (3) both.

With respect to enrollment, most of the expansion (though not all) can be attributed to federal mandates to increase the number of persons covered by Medicaid and/or to unfavorable economic factors, which cause people to seek public assistance. Therefore, most growth in payments related to enrollment is considered to be outside the discretion of states.

On the other hand, states do have considerable latitude (within the constraints of federal law and judicial action) to set policies governing provider reimbursement and recipient utilization. This is demonstrated by the variation among states of the relative importance of reimbursement/utilization. Index values for this factor range from –465.63 for Arkansas to 184.44 for West Virginia, indicating that these two states had the greatest changes in real unit costs, although in opposite directions. Table 2 shows that overall in the SLC, five states had a decline in real unit costs and eleven showed an increase (adjusted for inflation). Arkansas and Missouri had the largest decreases in payments adjusted for inflation from FFY 95-01, 29.0% and 12.9% respectively. Mississippi and Virginia had the largest increases in payments adjusted for inflation from FFY 95-01, 61.7% and 38.5% respectively.

Explanation: Inflation-adjusted growth data (see Table 1) was analyzed for Federal Fiscal Years 95 through 01 to determine the relative contribution to overall payment increases of the following factors: (1) enrollment increases and, (2) the combined effect of reimbursement and utilization policies. A growth index was constructed to indicate the importance of each factor to each state over the seven-year period.

Index values for "Enrollment" indicate the inflation-adjusted cost effect of covering additional recipients that entered Medicaid coverage during this period. On a region-wide basis, the number of Medicaid recipients increased 20.4% from 13.9 million in FFY 95 to 16.7 million in FFY 01.

The values for "Reimbursement and Utilization Policies" show the combined effect of the amount paid for services in excess of (or below) medical inflation, plus increases or decreases in the utilization of services by recipients. [Information reported is not adequate to isolate the effects of reimbursement and utilization, respectively, so these variables are combined.] States with positive values for this factor show varying increases in average payments per recipient, a result of either an increase in reimbursement levels above normal medical inflation or an increase in the utilization of services by recipients or both. Conversely, states with negative values for this factor were able to contain costs during the period by imposing or continuing restrictions on (1) the amount and type of services which recipients may use or (2) the level of reimbursement paid to providers for services or (3) both.

With respect to enrollment, most of the increase (though not all) can be attributed to federal mandates to increase the number of persons covered by Medicaid or to unfavorable economic conditions which increase public assistance rolls. Therefore, most growth in payments caused by enrollment is considered to be outside the discretion of states. On the other hand, states do have considerable latitude (within the constraints of federal law and judicial action) to set policies governing provider reimbursement and recipient utilization. This is demonstrated by the variation among states of the relative importance of reimbursement/utilization. Index values for this factor range from -465.63 for Arkansas to 184.44 for West Virginia, indicating that these two states had the greatest changes in real unit costs, although in opposite directions.

(Shows contribution to payment growth of enrollment when compared to other growth factors for each state.)

<sup>\*</sup>Rate shown is for Medicaid payments only. The FMAP (Federal Medical Assistance Percentage) is based on the relationship between each state's per capita personal income and that of the nation as a whole for the three most recent years. Federal share of state administrative costs is usually 50 percent or 75 percent, depending on function and whether or not medical personnel are used. \*\*Federal Fiscal Years 02 and 03 reflect latest estimates reported by each state (CMS 37).

\*Information supplied by State Medicaid Agency

## Waivers

A Freedom of Choice Waiver, approved under Title XIX, Section 1915 (b) of the Social Security Act, operating since October 1, 1988, established a coordinated system of pregnancy-related services in 66 of 67 counties

Several Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. These waivers include:

- •Mental Retardation/Developmental Disabilities: Serves 3,290 people, operating since October 1, 1980.
- •Aged and Disabled: Serves 6,316 people, operating since October 1, 1984.
- Physical Disabilities: Serves 362 people, operating since April 1, 1992.

Primary Care Case Management Waiver, Section 1915 (b) was implemented in January of 1997 in all of the 67 counties. The program will pay physicians \$3 per member per month up to a maximum of 1,000 eligibles per physician. The physician will act as the gatekeeper for recipients.

## **Managed Care**

- Any Willing Provider Clause: For pharmacies only. HMO's with pharmacies located on-site are exempt. Independent pharmacies are reimbursed at the same rate as contract providers as long as they meet the requirements and standards for participation.
- •The state contracts with 8 regional Prepaid Health Plans (PHP) to provide inpatient hospital services to all eligibles except Medicare Part A only recipients. The PHPs receive a per member per month capitated rate for each eligible in their region.

# **Coverage for Targeted Population**

•The Uninsured: The State pays disproportionate share payments to the Prepaid Health Plan for payments to member hospitals that provide indigent care.

# Cost Containment Measures

- •Certificate of Need Program since 1978. Regulates introduction or expansion of new institutional health facilities and services. 1993 exemption from certificate of need review for health care services of rural hospitals.
- •Significant increase in the thresholds for state review of expenditures for capital and operating costs for existing HMO's and facilities in 1994.
- Revised CON laws in 1998 to extend the review period of projects and made changes to appeal procedures related to CON decisions.
- •Rate setting. Prospective payment/per diem methodology used for Medicaid.
- Pharmacy Benefit Manager program implemented in 1998 to control increasing costs in the pharmacy program.

## Medicaid

- •15 optional services are offered.
- Provider tax on hospitals repealed March 1, 1993.
- •In 1998, Alabama implemented a program to pay for non-emergency transportation (due to judicial intervention); payments are made through a voucher system.
- Enacted legislation in 2000 that requires Medicaid to provide coverage for breast reconstructive surgery following a medically necessary mastectomy.
- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).

ALABAMA

## Children's Health Insurance Program: A Combination of Private Insurance and a Medicaid Expansion

- •CHIP in Alabama is administered by the Alabama Department of Public Health. Phase I, approved by HCFA on January 30, 1998, is an expansion of Medicaid to cover children/adolescents through age 18 in families with incomes up to 100% of the FPL. The state had enrolled 20,000 new eligibles by September of 2000.
- •Phase II (AL-Kids), approved by HCFA on August 18, 1998, is a separate state children's health insurance plan to cover children adolescents up to age 19 in families with incomes up to 200% of the FPL. The state had enrolled 38,980 new children by September of 2000.
- •AL Kids Plus, approved on September 28, 1998, provides a supplementary set of services for children with special health care needs.
- For families with incomes up to 150% of the FPL, there are no cost sharing obligations.
- Families with incomes between 150% and 200% of the FPL, the premium can be paid annually at \$50 per child/adolescent, or monthly at \$6 per child/adolescent for 10 months (\$60 annual total).
- •There are no copayments for preventive services, well-baby care, immunizations, and physical examinations.
- •Other cost sharing provisions include:
- \$3 copayment for brand name prescriptive drugs
- \$1 copayment for generic prescriptive drugs
- \$5 copayment for inpatient hospital care, physician visits, emergency services, urgent care, inpatient chemical dependency care, and dental services

## **Tobacco Settlement**

- •The state expects to receive approximately \$3.17 billion over 25 years.
- For Fiscal Year 2001, the tobacco settlement payment was approximately \$115 million.

The 21st Century Fund--\$11 million for debt service on bonds;

Children's First Program-\$62.3 million for various public health, mental health, education, juvenile probation and Department of Youth Services activities; Medicaid-\$37.4 for medical services;

Senior Services Trust—\$6.3 million from the general fund.

<sup>\*</sup>Rate shown is for Medicaid payments only. The FMAP (Federal Medical Assistance Percentage) is based on the relationship between each state's per capita personal income and that of the nation as a whole for the three most recent years. Federal share of state administrative costs is usually 50 percent or 75 percent, depending on function and whether or not medical personnel are used. \*\*Federal Fiscal Years 02 and 03 reflect latest estimates reported by each state (CMS 37).

\*Information supplied by State Medicaid Agency

## **Waivers**

Several Freedom of Choice Waivers have established a coordinated system of qualified Medicaid providers.

These include:

•The Primary Care Physician Program, under Title XIX, Section 1915 (b), of the Social Security Act, which also provides case-management services for most beneficiaries, except for Medicare/Medicaid dual eligibles and recipients in a Nursing Facility or an Intermediate Care Facility for the Mentally Retarded, has been operating since February, 1994. Under this program, Medicaid recipients must select a

primary care physician (PCP). Currently, 304,586 Medicaid recipients are enrolled in the PCP managed care program.

- Family Planning Services Waiver, under Section 1115 of the Social Security Act, which provides services for women of childbearing age who have a family income at or below 133% of the federal poverty guidelines, implemented September 1, 1997.
- ARKids First Waiver, under Section 1115 of the Social Security Act, which provides services for children 18 and under whose family incomes are at or below 200% of the federal poverty guidelines, implemented September 1, 1997. Copayments/coinsurance are not required for well-health services but are required for other services.
- •The Non-Emergency Transportation waiver is a statewide 1915(b)(4) selective contracting waiver. The State has contracts with a transportation broker in each region of the state. Medicaid recipients are required to arrange their non-emergency Medicaid transportation through their broker who is paid a capitated rate for qualified Medicaid receipients in their region. The waiver became effective March 1, 1998.
- Family Planning Services Waiver, under Section 1115 of the Social Security Act, which provides services for women of childbearing age who have a family income at or below 133% of the federal poverty guidelines, implemented September 1, 1997.
- •The IndependentChoices waiver s a Section 1115 demonstration, which increases the opportunity for consumer direction and control for Medicaid receipients receiving or needing personal care by offering a cash allowance and counseling services to self-direct their care rather than receiving traditional personal care services. Implemented November 1, 1998.

Several Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. These waivers include:

- Developmental Disabilities: Serves 2,423 people, operating since July 1, 1991.
- •Aged and Disabled: Serves 8,263 people, operating since July 1, 1990.
- •2,176 Home and Community Based Waiver, which provides services to the physically disabled on SSI and other individuals in need of nursing home level care, ages 21 through 64, implemented in July 1, 1997.

Enacted legislation in 1999 that authorizes DHS to apply to HCFA for approval to create and administer a low-income disabled working person category of Medicaid eligibility. This was implemented February 1, 2001. Serves working disabled individuals aged 16-64, who would be eligible for Supplemental Security Income (SSI) but not for earned income; net countable; income must be under 250% of the Federal Poverty Level.

# Managed Care

- •Any Willing Provider Clause: A law enacted in 1995 was repealed as a result of the judicial ruling in the case of the Prudential Insurance Company of America, et al versus the state of Arkansas, 9/2/98.
- •In 1997, enacted the "Arkansas Health Care Consumer Act" to cover issues such as inpatient care after childbirth, length of stay following a mastectomy, direct access to OB/GYNs, gag clauses, continuity of care, drug formularies, grievance procedures, and disclosure of patient records.
- Enacted legislation in 1999 that requires all insurers to offer a point-of-service plan.

**ARKANSAS** 

## Coverage for Targeted Population

- •The Uninsured: Arkansas does not have an indigent care program.
- •Arkansas became the first state to approve a medical high risk pool. The Comprehensive Health Insurance Pool Act, enacted in 1995, is designed to cover individuals with high risk health conditions. However, eligibility is restricted to individuals who: 1) have resided in the state for twelve consecutive months; 2) have had no equivalent coverage under any other plan for the past twelve months; and 3) have been rejected for similar coverage at similar rates by at least two other plans.
- Enacted legislation in 1997, Act 292 of 1997, that opened the Comprehensive Health Insurance Pool to federally eligible individuals (HIPAA eligibles).

## **Cost Containment Measures**

- Certificate of Need Program since 1975. Regulates introduction or expansion of new institutional health care facilities and services.
- Moratoriums on expansion of nursing home and residential care beds have been established and extended.
- Rate setting. Retrospective payment methodology used for Medicaid.

## Medicaid

- 30 optional services are offered.
- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).
- Enacted legislation in 2001 that authorizes the Arkansas Department of Health to apply for a Medicaid waiver to provide for a limited pharmacy benefit for Medicare-eligible individuals who do not have prescription drug coverage.
- •Under the pharmacy program, beneficiaries will be required to pay a \$25 annual fee and copayments of \$10 for generic drugs and \$20 for name brands.
- Enacted additional legislation in 2001 relative to Medicaid eligibility as follows:
- 1. Raises the Medicaid eligibility limit for individuals age 65 and older to \$4,000 for a single individual and \$6,000 for a maried couple.
- 2. Prohibits eligibility regulations for ARKids from including an assets or resource test for children or families of children age 18 or younger.
- 3. Continues Medicaid and food stamp benefits without the need for reappliction for as long as the family remains eligible under the requirements of the Transitional Employment Assistance Program.
- Created the Rural Health Access Pilot in 2001 to serve adults between 18 and 65 that are residents of the rural pilot community, have no insurance and are not eligibile for Medicaid, Medicare, veteran's benefits, or other government programs, and have an income under 200% of the FPL.

# Children's Health Insurance Program: Medicaid Expansion

- •The State has an SCHIP medicaid expansion in place from 10/1/98 through 9/30/02. The Medicaid expansion covered children born after 9/30/82 and prior to 10/1/83 in families with incomes at or below 100% of the Federal Poverty Level.
- •The State submitted a State Plan Amendment (SPA) for a separate state program on 12/4/98 to convert the funding for approximately one-third of the ArKids First benefit package to be SCHIP compliant. The modified benefit package provided an enhanced state employee plan with the following changes in the ArKids First benefit plan: 1) providing coverage for occupational and physical therapies, hospice care and skilled nursing care; and 2) eliminating copayments for dental well health care. This SPA was approved 2/16/01 but has not been implemented.
- The State submitted a subsequent SPA on July 10, 2002 to revise the benefit package; the benefits that were added in the SPA submitted 12/4/98 were deleted since they were no longer required for SCHIP compliance. This SPA is pending CMS approval.

## Tobacco Settlement

- •The state expects to receive approximately \$1.69 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$69 million.
- •In November 2000, proposed use of tobacco settlement monies was approved by the voters of the state.
- •The approved plan places the first \$100 million of the funds in the Arkansas Health Century Fund, with the balance going to the Tobacco Settlement Trust Fund.
- All other funds deposited in the Tobacco Settlement Trust Fund are to be allocated as follows:
- 15.8% for targeted state needs, such as the Arkansas School of Public Health and Area Health Education Center, the Center on Aging, and minority health care; 22.8% for the Arkansas Bioscience Institute Program;
- 29.8% for Medicaid expansion; and
- 31.6% for tobacco prevention and cessation.

The tobacco money will not be spent until the state reaches state-specific finality and the Legislature has appropriated the funds according to the plan.

<sup>\*</sup>Rate shown is for Medicaid payments only. The FMAP (Federal Medical Assistance Percentage) is based on the relationship between each state's per capita personal income and that of the nation as a whole for the three most recent years. Federal share of state administrative costs is usually 50 percent or 75 percent, depending on function and whether or not medical personnel are used. \*\*Federal Fiscal Years 02 and 03 reflect latest estimates reported by each state (CMS 37).

\*Information supplied by State Medicaid Agency

#### Waivers

The state operates two Freedom of Choice Waivers, under Title XIX, Section 1915 (b), to establish a coordinated network of Medicaid providers. These include:

- Primary Care Case Management Program (MediPass), which provides case management services for TANF and SSI-No Medicare recipients statewide and has been operating since 1991.
- Prepaid Mental Health Plan through Florida Health Partnership provides mental health services for beneficiaries in a five-county area and has been operating since March, 1996. Through this program, approximately 55,000 individuals receive a broad array of mental health services.
- Family Planning Waiver, under Section 1115, Title IV-A, of the Social Security Act, extends family planning services to women with incomes up to 185% of the FPL for two years post partum, operating since October 1, 1998.
- •In March 1998, HCFA approved another 1915 (b) waiver authorizing the state to provide sub-acute psychiatric inpatient diagnostic, treatment, and aftercare services to high-risk recipients under age 18. The program operates in Jacksonville and Fort Meyers.

Several Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. These waivers include:

- Aged & Disabled Age 18 and Over: The waiver serves 13,335 people, operating since April 1, 1982.
- Developmental Services (MR/DD): Two waivers serve approximately 25,000 people, operating since June 14,1980. In the Regular Session of 1999, the Florida legislature appropriated an additional \$200 million for expansion of the program.
- AIDS: Project Aids Care serves 6,757 people, operating since November 1, 1989.
- Disabled Frail Elderly Over Age 60: Serves 1,300 people, operating since November 15, 1994.
- •Model Waiver: Serves children with Degenerative Spinocerebellar Diseases, serves 5 people, operating since June 14, 1991. For 98-99, provided additional funding for up to 5 individuals.
- Nursing Home Diversion Waiver authorizes a long-term care demonstration project to allow the state to contract with various pre-paid, capitated risk-based health plans designed to provide primary and long-term health care services to individuals who are eligible for both Medicare and Medicaid. Implementation of the program began in December of 1998. Currently serves approximately 1,000 individuals.
- Traumatic Brain Injury and Spinal Cord Waiver, authorized in Regular Session 1998. The state implemented the program in September of 1999. Current enrollment is approximately 117 individuals.
- •The Channeling Project: Provides home and community based services through an organized health care delivery system to approximately 1,500 individuals, operating since 1985.
- Consumer Directed Care: This is a five year 1115 demonstration waiver to test the feasibility of recipients purchasing services from providers of their choice as opposed to receiving traditional services from a home and community based services waiver. The waiver is approved for operation from October 1998 to October 2003, and there are approximately 3,700 participants to date.

# **Managed Care**

- Any Willing Provider Clause: For pharmacies only. HMO's with pharmacies located on-site are exempt. Independent pharmacies are reimbursed at the same rate as contract providers as long as they meet the requirements and standards for participation.
- •Managed Care Choice Counseling: The counseling activities provide information to Medicaid enrollees to assist recipients in the selection of a health care provider; offers impartial information about MediPass and other prepaid health maintenance plans to enable recipients in their decision; if recipients do not choose a provider, they will be assigned to one of the available options in their locale.

FLORIDA

### Managed Care (continued)

Enacted legislation in 1999 that prohibits an HMO from canceling or failing to renew a contract without giving the subscriber at least 45 days notice in writing. Enacted legislation in 1999 that requires each exclusive provider organization, HMO and prepaid health clinic to allow female subscribers to visit a contracted OB/GYN for one annual visit and any medically necessary follow-up care.

### Coverage for Targeted Population

• The Uninsured: Florida does not have a statewide indigent care program, however, there are local programs subsidized through special tax districts.

### Cost Containment Measures

- Certificate of Need Program since 1973, amended in 2000. Regulates introduction or expansion of new institutional health facilities and services; exempts CON requirements for Medicare-certified home health agencies, respite care services, retirement communities and residential facilities that only serve retired military personnel and their dependents.
- Rate-setting established. A state authority approves a budget or rate structure for hospitals.
- Patient Transportation Services: Established prepaid capitation rates, prior authorization, and increased use of mass transit. For FY 98-99, capped funding at \$85.9 million.
- Nursing Homes: Reduced holding bed days from 15 to 8, therapeutic leave days from 30 to 16, and inflation limitations from 1.5 to 1.4 times inflation; reform incentives; and minor changes to the Fair Rental Value System.
- Home Health Care: Develop policy and procedures to ensure that Medicare is the primary payer for dual eligible recipients; and established prior authorization for home health, durable medical equipment and private duty nursing.
- •Outpatient Hospital: Limited the inflation rate increase allowed by reducing the target rate increase from 3.2 to approximately 1.4 times inflation.
- •Inpatient Psychiatric Hospital: Developed prior authorization process and managed care policies for community based services for children.
- Implemented provider enrollment reforms for transportation, durable medical equipment, home health, and physician group providers.
- Established a methodology to bill counties for 35% of the cost of hospital inpatient days (13 through 45) utilized by Medicaid recipients enrolled in Medicaid PHP and HMOs.
- Pharmacy Reforms: Implemented a variable dispensing fee for prescription drugs. The current Medicaid program pays for the cost of the drug plus a dispensing fee of \$4.23 for each prescription. The new policy will permit the development of a variable dispensing fee determined by volume and other factors.
- For FY 99-00, Florida projects an increase of \$20.7 million in collections from pharmaceutical manufacturers for drug rebates based on the utilization of drugs by Medicaid eligible persons enrolled in Health Maintenance Organizations and Prepaid plans.

#### Medicaid

- 24 optional services are offered.
- All licensed HMO's have to take part in Medicaid unless they already have enrolled a specified number of Medicaid or Medicare enrollees.
- Counties pay 35% or \$55 per month for each nursing home resident and 35% of the non-federal share for the 13th through 45th day of of an inpatient stay for nursing home residents.
- Funded the Adult Cardiac Transplant Program as a result of the completion of a study as to the long term cost for this initiative.
- Expanded the Elderly Assisted Living Facility Waiver and the Elder Home and Community Based Services Waiver.
- •In 2000, enacted new laws to: 1) require hospitals and clinics to provide newborn hearing screening; 2) allow the state to contract with an entity to provide behavioral health services through a capitated, prepaid arangement; 3) expand eligibility for MediKids, Florida KidCare and Medicaid to children and pregnant women; 4) implement clinical eligibility and fee collection requirements for publicly funded substance abuse and mental health services; and 5) direct the Medicaid agency to implement a Medicaid prescription drug spending control program.
- Enacted the Prescription Affordability Act for Seniors to provide prescription drug subsidies, up to \$80 per person per month, to low income Florida residents age 65 and older with incomes between 90% and 120% of the FPL.
- Effective January 1, 2001, the Florida Medicare Prescription Discount Program will ensure that seniors do not pay full retail price for prescription drugs.

#### Medicaid (Continued)

The program requires pharmacies to charge Medicare beneficiaries a price no greater than average wholesale price of the ingredients minus 9% plus a dispensing fee of \$4.50 (applies to Medicaid dual eligibles).

- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).
- Enacted legislation to extend Medicaid coverage to individuals that could be eligible as a result of the federal Ticket to Work and Medicaid Buy-in legislation. The programs will provide services to individuals with disabilities that are required to enable them to gain or keep employment.

### Children's Health Insurance Program: A Combination expansion of Medicaid and Florida Healthy Kids (Title XXI)

- Expanded Medicaid coverage for children age 15 to 19 in families with incomes up to 100% of the FPL; provides coverage for an additional 24,369 children/adolescents. The plan received HCFA approval on March 5, 1998.
- •Expanded Florida Healthy Kids program for children/adolescents age 5 to 19 in families with incomes up to 200% of the FPL (includes premium subsidies); provides coverage for an additional 119,000 individuals. The Florida Healthy Kids program also offers full pay buy-in above 200% of the FPL; premiums of \$54 per month per member.
- Added Medikids program to provide coverage for children from birth to age 5 in families with incomes up to 200% of the FPL; provides coverage for an additional 23,000 children. The plan received HCFA approval on September 8, 1998.
- Added Children's Medical Services (CMS) Network program to provide coverage for individuals under the age of 18 with special health care needs in families with incomes up to 200% of the FPL; provides coverage for an additional 6,326 eligibles. CMS allows individuals with special needs to have a specialist as their primary care physician without any special authorization.
- Shifted coverage from MediKids and CMS Network to Medicaid for children birth to age one effective July 1, 2000.
- Received HCFA approval in March 2000 to implement a dental pilot program in Palm Beach and Dade counties.
- Expanded Medicaid coverage to enroll children under age 1 with family incomes between 185% and 200% of the FPL and eliminated coverage for this group under MediKids and Title XXI CMS Network.
- The four programs combined provide health care coverage to approximately 250,000 individuals as of July 2001.

#### Tobacco Settlement

- •The state expects to receive approximately \$18.6 billion through 2032.
- For Fiscal Year 2001, the tobacco settlement payment was approximately \$731.3 million.

Enacted legislation in 1999 that distributed tobacco settlement monies into eight separate trusts, including one named for the late Governor Lawton Chiles. The Lawton Chiles Tobacco Endowment (LCTE) for Children and the Elderly uses tobacco monies to ensure the financial health of programs for children and seniors.

- The legislature appropriated funds for state fiscal year 2001 as follows:
- \$149 million to the Agency for Health Care Administration, includes \$40 million for the state's CHIP.

\$177 million to the Department of Child and Family Services, includes \$142 to fund existing programs, \$24 million for foster care programs, and \$8 million for substance abuse treatment.

\$25 million to the Department of Elderly Affairs, including \$3 million for assisted living and home and community-based care.

\$93 million to the Department of Health, including \$39 million for tobacco prevention and control.

• Enacted legislation that earmarks \$150 million of the principal in the LCTE for a separate endowment for biomedical research.

#### ADDITIONAL STATE HEALTH CARE INFORMATION

Sources: "Major Health Care Policies: 50 State Profiles", Health Policy Tracking Service, January, 2002; and "Medicaid Services State by State", HCFA, October 2001. \*Information supplied by State Medicaid Agency

#### Waivers

Two Freedom of Choice Waivers, under Title XIX, Section 1915 (b), of the Social Security Act, established a coordinated network of Medicaid providers:

- •Georgia Better Health Care Program (GBHC) provides a statewide case managed health care system for TANF, TANF-related, and SSI beneficiaries. It has been operating since October 1, 1993. The state was granted an extension on this program through July 2000. Approximately 685,000 Medicaid recipients (around 80% of all recipients) were enrolled as of April 2000.
- Voluntary HMO program was implemented in early 1996. By the end of SFY 1996 nearly 8,000 Medicaid recipients in 13 counties had enrolled in the program. The Division of Medical Assistance, DCH expanded HMO coverage to 28 counties and had approximately 60,000 Medicaid recipients by June 1998, increasing to 120,000 by June 1999.
- Mental Health/Mental Retardation Waiver provides rehabilitation services to nursing home residents. It has been operating since April, 1994.

Georgia has 5 home and community-based waivers and two demonstration projects that have been approved by the Centers for Medicare and Medicaid Services (CMS). Some of the services provided to individuals in waiver programs include: personal support, skilled nursing, environmental modification services, specialized medical equipment and supplies, counseling, emergency response system, home health services, transportation, day care, day habilitation, personal care home, home delivered meals, respite care services, and case management services.

During State Fiscal Year 1999, 18,204 individuals were served under the waiver programs at an average cost of \$8,893 per person. During this same time frame, 47,302 individuals were served in nursing facilities at an average cost of \$15,230 per person.

# Managed Care

Any Willing Provider Clause: Yes. Broad, applies only to Blue Cross/Blue Shield.

# **Coverage for Targeted Population**

- •The Uninsured: The State provides disproportionate share payments (DSH) for indigent care through the Indigent Care Trust Fund (ICTF), established in 1990.
- •The Indigent Care Trust Fund (ICTF) II, implemented in May of 1997, was specifically designed to assist hospitals in small communities and rural areas. The ICTF II provides disproportionate share payments to 17 small hospitals statewide. In SFY 2000, 92 qualifying hospitals elected to participate in ICTF, compared with 87 hospitals in SFY 1999. These hospitals shared \$388 million, up from \$314 million in SFY 1999. Thirteen hospitals qualified in SFY 2000 that did not qualify in the previous year. Ten SFY 1999 qualifying hospitals failed to qualify in SFY 2000.

### Cost Containment Measures

- Certificate of Need Program since 1979. Regulates introduction or expansion of new institutional health care facilities and services. 1994 legislation revised composition and duties of the Health Planning Review Board and sets procedures for appeals of certificate of need decisions.
- •The Department of Medical Assistance (DMA), in conjunction with the Office of the U.S. Attorney in Georgia, the State Healthcare Fraud Control Unit and other state and Federal law-enforcement agencies are seeking to reduce Medicaid fraud. In SFY 1996, the majority of cases prosecuted involved DMA's non-emergency transportation (NET) providers. Of the 20 firms indicted at that time, 17 were NET providers, while the remaining involved therapy and developmental learning centers. An additional 16 individuals were indicted during SFY 97.
- Privatization of administrative functions, including claims payment and the Medicaid Management Information System (MMIS) which maintains the Department's claims data.

GEORGIA

### Medicaid

- •37 optional services are offered.
- •Non-Emergency Transportation (NET) Broker Program, was implemented in 1998, and replaced direct providers of NET services with a broker to administer services to recipients. Payments to brokers will be made on a capitated rate based on the number of Medicaid eligibles in one of the five regions.
- Enacted legislation in 2000 that exempted durable medical equipment from state sales and use tax if paid for directly by Medicare or Medicaid.
- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).

# Children's Health Insurance Program: State Designed Plan

- •The state initiated and expanded health insurance coverage for the Children's Health Insurance Program with funds made available in the Balanced Budget Act of 1997. State officials estimate that Georgia has 299,000 uninsured children/adolescents at the current time.
- CHIP in Georgia is called "PeachCare for Kids." The program is administered by the state Medicaid agency, but as a separate program and not an expansion of Medicaid. The program was approved by HCFA on September 3, 1998. As of January, 2000 approximately 56,000 children/adolescents had enrolled in the program.
- •Uninsured children/adolescents will be eligible for PeachCare benefits if their families' incomes are less than or equal to 235% of the FPL.
- Families with children age 6 and older will be charged a monthly premium for the cost of PeachCare coverage; \$7.50 per month for one child and \$15.00 for two or more children. No premiums will be charged to families with children age 5 or younger.
- Children / adolescents enrolled in PeachCare for Kids have the option to use the primary care case management program or enroll in a managed care organization.

#### Tobacco Settlement

- The state expects to receive approximately \$4.81 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$201 million.
- Created the Georgia Tobacco Community Development Board and Board Overview Committee; charged with determining the allocation of private trust funds among tobacco growers and tobacco quota owners.
- •\$63 million to the GeorgiaOne Fund for rural economic development programs
- •The Legislature appropriated tobacco monies (\$103.3 million) for the FY 02 budget as follows:

\$34.1million for OneGeorgia;

\$8.2 million for Medicaid expenditures for pregnant women and children;

\$4.5 million for PeachCare;

\$10.2 million for mental retardation waiver;

\$30 million for school nurses;

\$3.5 million for rural health infrastructure;

\$5 million for cancer treatment for low-income uninsured individuals;

\$2.1 million for cancer screening; and

\$5.7 million for cancer scientists, clinicians, and scholars.

<sup>\*</sup>Rate shown is for Medicaid payments only. The FMAP (Federal Medical Assistance Percentage) is based on the relationship between each state's per capita personal income and that of the nation as a whole for the three most recent years. Federal share of state administrative costs is usually 50 percent or 75 percent, depending on function and whether or not medical personnel are used. \*\*Federal Fiscal Years 02 and 03 reflect latest estimates reported by each state (CMS 37).

\*Information supplied by State Medicaid Agency

#### **Waivers**

Kentucky operates two waivers under Title XIX, Section 1915 (b). One, a Freedom of Choice Waiver, established a primary care case management program for Medicaid beneficiaries, in which a case manager acts as a gatekeeper to the system. This program, called KenPac: Patient Access to Care, has been operating since March 1, 1987 and operates in 113 of 120 counties. The second 1915 (b) waiver, a Selective Contracting with Providers Waiver, went into effect in February, 1996 and allows the state to choose contractors to provide non-emergency transportation to beneficiaries to and from medical services.

Kentucky has one health reform demonstration wavier, The Partnership, approved October 12, 1995, under Title IV-A, Section 1115, of the Social Security Act, implemented on July 1, 1996. Under The Partnership, the state was divided into eight managed care regions with a network consisting of public and private providers. As of July 1, 1998, two of the eight partnerships had been approved. The Partnership will improve access for 493,000 current Medicaid eligibles.

Kentucky also operates a number of Home and Community Based Service Waivers, under Section 1915 (c), enabling the state to provide long-term care services to people who otherwise would require institutionalization: They include:

- Elderly & Disabled: Serves 17,500 people, operating since January 1, 1987.
- Mental Retardation/Developmental Disabilities: Serves 1,609 people, operating since January 1, 1984.
- Ventilator-Dependent Individuals: Serves 100 people, operating since October 1, 1987.
- Traumatic Brain Injury: HCFA approved in March of 1999. Operational since April 1999. The waiver is approved for 110 personal care and 990 home care slots.
- •Disabled adults age 18 and older with severe physical disabilities:

# Managed Care

• Any Willing Provider Clause: For all providers (1994); the law was expanded in 1996 to include Chiropractors as primary care providers.

# Coverage for Targeted Population

- •The Uninsured: The Medical Assistance Indigent Trust Fund provides funds for disproportionate share hospitals. The fund imposes provider taxes to generate federal revenue to be used to pay uncompensated care costs to hospitals, nursing homes, physicians, home health agencies, and pharmacies.
- Legislation passed in 1996 phases out various provider taxes over four years--as of July 1, 2000 all provider taxes, except a hospital tax of 2.5%, were to expire.
- •Enacted legislation in 2000 that creates the Kentucky Access program, the state's high-risk pool, to provide health insurance to the sickest population. The program will be funded with approximately \$17 million in tobacco settlement monies and up to \$16 million in existing assessments on insurance companies.

# Cost Containment Measures

- Certificate of Need Program since 1972. Regulates introduction or expansion of new institutional health facilities and services.
- •Health Policy Board may set a target expenditure limit for total state health expenditures with the goal that the rate of increase decline by 10% per year until it is equal to the rate of increase in state personal income. The Board also has some oversight over the Medicaid program and related cost containment measures. Cost controls include: purging rolls of ineligibles; constructing conservative reimbursement methodologies; reviewing existing cost-based reimbursement systems for hospitals and nursing homes to determine whether more cost effective alternatives such as Diagnostic-Related Groups (DRG's) exist; restricting non-emergency transportation; strengthening utilization review; using "smart cards" to monitor utilization of services and other computer technology to facilitate

KENTUCKY

utilization review (with a focus on prescription drug utilization); instituting aggressive collections procedures; and reducing disproportionate share payments to facilities which fail to provide free services to sufficient numbers of indigent patients. However, there is no longer a Health Policy Board. It has not been in existence since July 1996.

- Physicians' offices must now apply for a certificate of need for any new major equipment in excess of \$500,000.
- •Rate setting. Prospective payment/per diem methodology used for Medicaid.

### Medicaid

- •24 optional services are offered.
- In 2000, enacted at least 10 pieces of legislation in the areas of telehealth, mental retardation and developmental disabilities, senior pharmacy assistance, inherited metabolic disorders, transportation services, chiropracters, critical access hospitals, provider taxes, and disproportionate share hospitals. Did not pass any significant Medicaid legislation in 2001.

# Children's Health Insurance Program: Medicaid expansion and state designed plan

- •CHIP in Kentucky, called "Kentucky Children's Health Insurance Program" (KCHIP), received HCFA approval on November 30, 1998. The program, which is a combination of Medicaid expansion and a state-designed insurance plan, is administered by the state Medicaid agency. The Medicaid expansion provides health care coverage for eligibles age 14 to 19 in families with incomes up to 100% of the FPL. The KCHIP insurance program provides health care coverage to individuals birth to 19 in families with incomes between 100% and 200% of the FPL who are not Medicaid eligible; expected to provide coverage to an additional 78,000 eligibles through both programs.
- For families with incomes up to 100% of the FPL, there are no cost sharing obligations.
- Families with incomes between 101% and 200% of the FPL are required to pay premiums as follows:

100%-133%: \$10 per 6 month period 134%-149%: \$20 per 6 month period

150%-200%: \$20 per month per six month period (not to exceed 5% of the family's annual income)

# Tobacco Settlement

- The state expects to receive approximately \$3.45 billion over 25 years.
- For Fiscal Year 2001, the tobacco settlement allocation was approximately \$122 million.
- •Several specific measures for use of tobacco settlement monies were adopted by the Legislature in FFY 00 as follows:

50% of the tobacco settlement funds will go to farmers, rural counties, and agriculture projects

25% of the tobacco settlement funds will be used to fund early childhood development programs

25% of the tobacco settlement funds will be used to fund health care initiatives, including Kentucky Access (70%), lung cancer research (20%) and tobacco use prevention and control (10%).

#### Waivers

Through a Freedom of Choice Waiver under Title XIX, Section 1915 (b), Louisiana provides a fee-for-service case management system for TANF and SSI recipients and related groups. The program, Community Care PCCM, has been operating since 1993.

Louisiana also has several Home and Community Based Waivers under Section 1915 (c), which enables the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- •Elderly and Disabled Adult Waiver (EDA): Can serve up to 1,579 people; anticipates providing services to 1,421 individuals in FY 03, operating since July 1, 1993
- •Mental Retardation/Developmental Disabilities: Can serve up to 4,251 people, operating since June 1, 1990. The legislature approved 325 new slots for FY 03, contingent upon the submission of a new plan and approval by the Joint Legislative Committee on the Budget.
- Adult Day Health Care Waiver (ADHC): Currently can serve up to 533 people, operating since January 1, 1985
- •Personal Care Attendant Waiver (PCA): Currently can serve up to 149 people, but will be increasing to 174 people toward the end of FY 03, operating since October 1, 1993.
- Children's Choice Waiver (CC): Can serve up to 800 children during FY 03, operating since February 21, 2001.

Created the Jefferson Parish Health Authority and the Capital Area Human Services District as community based programs. These entities are restrictive to outpatient and inpatient care services in the area of substance abuse, and outpatient care services for mental retardation, mental health, and public health.

### Managed Care

- Any Willing Provider Clause: Enacted legislation in 1997 to allow rural providers to be reimbursed at the same rate as a contract provider as long as the rural provider meets the requirements and standards for participation.
- •Received approval on March 26, 2001 to extend the operation of the Louisiana CommunityCARE (LCC) program for 2 more years. LCC is a primary care case management program that serves approximately 255,554 Medicaid recipients in 39 parishes with 776 enrolled primary care providers.

# **Coverage for Targeted Population**

• Provides coverage for the uninsured mainly through state charity hospital system. In 1997, the state reinstated the Medically Needy Program.

# **Cost Containment Measures**

- •For FY 02, Act 395 of the 2001 Regular Legislative Session permits the Department of Health and Hospitals to utilize a prior authorization process and a preferred drug list for its Medicaid prescription benefits management program in an effort to promote cost effectiveness in the Medicaid Program. With the implementation of the PA process, drugs will be considered "preferred" or "non-preferred". Non-preferred drugs will require PA as a condition for payment by the program. The Department is also negotiating State Supplemental Drug Rebates with drug manufacturers. Act 395 also mandates the Department to implement the Peer Based Prescriber Practitioner Profile Program. This program will begin in October 2002.
- Enhancement of computer system to scan 5% of cases (up from the current 1%) to combat fraud in Medicaid claims.
- •The Department provided plastic magnetic strip cards for Medicaid recipients. This will reduce fraud and lower administrative costs over time for both providers and the state. The program was implemented in SFY 98 and completed statewide in January 1999, served approximately 788,000 in FFY 01.

# Medicaid

- •28 services are offered (10 mandatory and 18 optional).
- Enacted legislation in 2000 that created the Medicaid Nursing Home Trust Fund. Interest earnings (approximately \$60 to \$80 million per year) from monies

LOUISIANA

#### Medicaid (Continued)

deposited in the fund will be appropriated by the legislature to provide additional support for nursing home providers and to increase the state's effort relative to the Medicaid assisted living program.

- •Enacted legislation in 2001 as follows:
- 1. Created the Medicaid School-Based Administrative Claiming Trust Fund to reimburse public schools for the actual costs of administrative outreach provided by the school districts;
- 2. Established the Medicaid Pharmaceutical and Therapeutic Committee—authorized the committee to develop and maintain a preferred drug list in conjunction with a prior authorization process;
- 3. Authorized Medicaid to change the reimbursement methodology for nursing home services; and
- 4. Directed DHH to develop and implement a pilot program to provide hospice care under the state plan.

### Children's Health Insurance Program: Medicaid Expansion

- The Children's Insurance Program (LaChip-Phase I) was implemented in November of 1998. The Medicaid program was expanded to provide health care benefits to children/adolescents from birth to age 19 in families with incomes up to 133% of the FPL. The program expects to provide coverage to approximately 52,000 children by October 1, 1999.
- Legislation enacted in the Regular Session of 1999 (ACT 1197) authorized the expansion of LaCHIP.
- Phase II expanded Medicaid to provide health care benefits to children/adolescents from birth to age 19 in families with incomes up 150% FPL and was expected to enroll 10,725, effective October 1, 1999.
- Phase III implemented January 1, 2001 to provide health care benefits to children/adolescents from birth to age 19 in families with income from 151-200% FPL and was expected to enroll an additional 12,000 children. All three phases are Medicaid expansions.

#### Tobacco Settlement

- The state expects to receive approximately \$4.42 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$185 million.

Legislation was enacted in 1999 that required passage of a constitutional amendment. This measure received voter approval in November 1999.

The law created the Tobacco Settlement Trust Fund (The Millennium Fund) and The Louisiana Fund.

The Millennium Fund is a constitutionally created endowment fund for the deposit of tobacco settlement monies as follows:

SFY 01	45%
SFY 02	60%
SFY 03 and subsequent years	75%

The Millennium Fund is made up of three funds which receive investment earnings as follows:

TOPS Fund	33%
Health Excellence Fund	33%
Education Excellence Fund	. 33%

•In 2001, the state securitized 60% of the tobacco settlement revenue and received approximately \$1.2 billion from the transaction. The revenue realized from the sale of the bonds will be distributed to the Louisiana Fund and the Millennium Fund as required by law.

LOUISIANA

• For 2002, the legislature allocated a portion (\$67 million) of the revenue received from securitization of the tobacco settlement monies as follows:

From the Louisiana Trust Fund

- •\$20.5 million for Medicaid;
- •\$15.0 million for LaCHIP;
- •\$5.8 million for school clinics;
- •\$0.5 million for tobacco cessation;
- •\$2.8 million for health science grants; and
- •\$1.5 million for preschool programs.

From the Millennium Trust Fund

- •\$1.6 million for health care; and
- •\$1.3 million for tuition assistance.

From the Education Excellence Trust Fund

•\$18.0 million to private and public school systems.

#### Waivers

Maryland's Medicaid managed care program is called HealthChoice. Under a 1115 Waiver, approved on October 30, 1996, HealthChoice enrollment began in June of 1997. Service delivery began July 1, 1997. The Program covers over 420,000 recipients, which includes both Medicaid and Maryland Children's Health Insurance Populations (MCHP and MCHP premium).

- •The Rare and Expensive Case Management Program (REM): The REM, as part of HealthChoice Program, was developed to address the special requirements of waiver eligible individuals diagnosed with rare and expensive conditions and diseases. In addition to standard Medicaid benefits, this program provides intensive case management to an expanded set of benefits known as optional services.
- •Stop Loss Case Management (SLM) Program: Under the HealthChoice Program, a Managed Care Organization (MCO) may apply for Stop Loss protection when inpatient hospital costs for an enrollee exceed \$61,000 in one calendar year. The state assumes responsibility for 90% of the accrued inpatient hospital costs in excess of \$61,000; the MCO is responsible for the remaining 10%. The MCO reassumes full responsibility for the enrollee at the beginning of However, if an inpatient enrollee remains hospitalized at the end of a calendar year and ultimately incurs hospital costs for that stay that exceed \$61,000 in the following calendar year, the Department's Stop Loss period covers that hospitalization. Effective July 1, 1999 an MCO which was participating as of April 1, 1999 and was unable to self-insure or purchase private Stop Loss insurance could request that the Department continue to provide Stop Loss protection with the cost borne by the MCO. All but two MCOs took responsibility for purchasing their own Stop Loss coverage. One exited the program on May 1, 2001 and the remaining MCO continues to receive Stop Loss coverage through the State.
- •Pharmacy Point-of-Sale: The pharmacy electronic point-of-sale claims management and prospective drug utilization review system began January 1993. This successful system provides on-line real time pharmacy claims adjudication for all outpatient prescription drugs for the fee-for service Medicaid population. Additionally, this system also has an enhanced feature called Coordinated PRO DUR which checks for drug interactions or conflicts with dispensing of medication and for inappropriate utilization. PRO DUR is available to both the Medicaid fee-for-service population and to the Health Choice population.

Several Home and Community Based Service Waivers under Section 1915 (c) enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- •The Waiver for Older Adults (age 62 and over): Provides the appropriate level of assistance in a residential setting for eligible recipients who reside in group homes approved by the Maryland Department of Aging. Serves 135 people, operating since July 1, 1993. In August 1999, an amendment request was filed with HCFA to expand the waiver to serve more individuals who have disabling conditions associated with aging and to be cared for in their own homes. This amendment was approved and became effective January 1, 2001. It now provides services to individuals aged 50 and above, in participating licensed assisted living facilities or in their own homes. There are now 2,135 slots.
- •Mental Retardation/Developmental Disabilities: For developmentally disabled individuals as an alternative to institutionalization in an ICF/MR. This waiver serves almost 6,000 individuals and has been in operation since April 1, 1984.
- Model Waiver for Disabled Children: For medically fragile/technology dependent children so that they can be cared for at home. This waiver serves approximately 186 individuals and has been in operation since January 1, 1985. This waiver is capped at 200 slots.

### Waivers (Continued)

- •Traumatic Brain Injury (TBI) Waiver: Targets individuals age 22-64 who have suffered traumatic brain injuries that occurred on or after age 22. These individuals must have been discharged from state psychiatric hospitals after a 30 day stay, and must meet a hospital or nursing home level of care. The application to amend this program was submitted to HCFA in August of 1999. Upon the recommendation of CMS following a federal policy change, the application is being amended.
- Autistic Children Waiver: Targets children age 1-21 that are diagnosed with Autism Spectrum Disorder and who require an ICF/MR level of care. Application submitted to HCFA in August of 1998. This waiver was approved in September 2000. It became effective July 1, 2001. There are 550 children being served as of September 2002.
- •MD Community Choices Waiver: Targets persons age 21-59 who are physically disabled and require personal care services. It became effective in April of 2001. There are 300 people served as of August 2002.

# Managed Care

- Capitation: For most covered services, MCO's are paid by the state through actuarially sound, risk-adjusted capitation rates. The Adjusted Clinical Group (ACG) System is the health-based, risk-adjusted system used as the basis for developing the State's payments.
- •Self-referred Services: Some covered services may, at the enrollee's option, be delivered by an out-of-plan provider at the MCO's expense. The services that an enrollee has the right to access on a self-referral basis include: 1) Specified family planning services including office visits; 2) Specified services provided by a school-based health center; 3) Pregnancy-related services when a new HealthChoice enrollee has an established out-of-network provider; 4) Initial medical examination of children in State custody; annual diagnostic evaluation as an enrollee with a diagnosis of HIV/AIDS; 5) Annual HIV/AIDS diagnosis and evaluation service (DES); 6) Renal dialysis; 7) The initial examination of a newborn before discharge from a hospital if performed by an out-of-network on-call hospital provider; and 8) Pharmaceutical and laboratory services, when provided in connection with a legitimately self-referred service, provided on-site where the self-referred services were performed, and by the same out of plan provider.
- •Specialty Mental Health (SMH) System: Specialty mental health services are provided through Specialty Mental Health System, which is administered by the Mental Hygiene Administration (MHA), in conjunction with local Core Services Agencies. The Administrative Services Organization (ASO), Maryland Health Partners, provides administrative services for this system. It enrolls patients, coordinates benefits, and pre-authorizes services. The services provided under this system are reimbursed by the State on a fee-for-service basis. Recipients can be referred by their primary care provider to Maryland Health Partners for entry into the Specialty Mental Health System, or they can self-refer.

# Coverage for Targeted Population

- •AIDS Insurance Assistance Program: The state pays to maintain employee-based insurance coverage for HIV positive individuals who can no longer work because of their illness, effective October of 1997.
- •Maryland Pharmacy Discount Program: In August 2002, Maryland received federal approval of the Maryland Pharmacy Discount Waiver Program. This Program will allow Maryland to provide assistance to low-income Medicare beneficiaries with incomes at or below 175% of FPL and other persons with incomes at or below 176% of FPL who are not eligible for Medicaid or MCHP.

# Cost Containment Measures

•All-payer System: In July of 1977, Maryland received a federal waiver for Medicare and Medicaid reimbursement requirements. Under the waiver, hospitals are paid rates that are approved by the Maryland Health Services Cost Review Commission (HSCRC). All rates must be set equitably and non-discriminatory for all purchasers of service. Under current rules, general hospitals are paid the approved rate minus a 6% discount.

#### Medicaid

- •22 optional services are offered.
- Enacted legislation in 2000 that: Provide home and community-based services and supplies to individuals aged 21 thru 59 who will be discharged or diverted to a nursing facility, and expand current home and community-based services waiver to include 300 individuals.
- In March 2001, received approval from the HHS to extend Medicaid coverage to low-income, uninsured women for breast or cervical treatment. As of August 2002, there are about 62 women who are enrolled in this program.

## Children's Health Insurance Program: Medicaid Expansion

- •Maryland Children's Health Program (MCHP) provides health insurance coverage for children/adolescents in low income families and pregnant women. The program's services through HealthChoice are available for individuals up to age 19 and pregnant women of any age in families with incomes up to 250% of the FPL. The program, which received HCFA approval on July 29, 1998, uses funds provided under Title XXI of the Social Security Act.
- •MCHP offers the same benefit package as regular Medicaid. As of August 2002, approximately 108,000 eligible children have been enrolled in MCHP.
- Enacted legislation in 2000 expanded coverage provided through MCHP to children in families with incomes from 200% through 300% of FPL. This new MCHP expansion program is called MCHP *Premium*.
- •On July 1, 2001, MCHP Premium was implemented. MCHP Premium's requires a payment of a monthly family premium of \$38.00 for a family with income above 200% through 250% of FPL, or \$48.00 for a family with income above 250% through 300% of FPL. Under MCHP Premium, children whose families have access to employer-sponsored insurance (ESI) that meet Title XXI requirements will be covered in ESI. The state will provide secondary insurance to cover co-payments, deductibles and coinsurance amounts. Also under MCHP Premium, children whose families do not have access to qualifying ESI will be covered in a Medicaid "look-alike" plan. These children will be enrolled in a MCO that offers the same services provided to children in Maryland's Medicaid managed care program. As of August 2002, the total number of cases referred to MCHP Premium was 3,229.

### Tobacco Settlement

- The state expects to receive approximately \$4.0 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$185 million.
- The Cigarette Restitution Fund (CRF) to act as a depository for all monies received as a result of the tobacco settlement.
- Recommendations from the Legislative Policy Committee (created in the CRF legislation) were submitted to the governor in January 2000.
- Based on the governor's budget proposal for FY 02, the Maryland General Assembly allocated the funds as follows:
- •\$20.1 million for tobacco prevention and control;
- •\$18.5 million for substance abuse treatment;
- •\$49.9 million for K-12 and Higher Education;
- •\$6.3 million for tobacco crop conversions; and
- •\$1.0 million for the Maryland Health Care Foundation.

#### ADDITIONAL STATE HEALTH CARE INFORMATION

Sources: "Major Health Care Policies: 50 State Profiles", Health Policy Tracking Service, January, 2002; and "Medicaid Services State by State", HCFA, October 2001.
\*Information supplied by State Medicaid Agency

#### Waivers

Through its Freedom of Choice Waiver, HealthMACS, under Title XIX, Section 1915 (b), Mississippi provides primary care case management for TANF-related Medicaid beneficiaries in 28 counties. The program has operated since October 1, 1993. Operating statewide since July 1, 1998.

Capitated Managed Care Project: The managed care program was ended in FY 2001.

Several Home and Community Based Service Waivers under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Serves 6,857 people, operating since July 1, 1994.
- Mental Retardation/Developmental Disabilities: Serves 1,900, operating since July 1, 1995.
- •Independent Living: Served 354 people in FY 2001.
- Assisted Living: Served 5 people in FY 2001. Implemented Oct. 1, 2000.

### Managed Care

- Any Willing Provider Clause: For pharmacies only. HMO's with pharmacies located on-site are exempt. Independent pharmacies are reimbursed at the same rate as contract providers as long as they meet the requirements and standards for participation.
- The managed care program was eliminated in 2001.

# Coverage for Targeted Population

• The state does not have a statewide indigent care program, however, legislation enacted in 1996 specifies that University of Mississippi Medical locations shall provide at least 50% of their services to indigent persons.

# **Cost Containment Measures**

- Certificate of Need Program since 1979. Regulates introduction or expansion of new institutional health care facilities and services.
- Rate setting. Prospective/per diem methodology used for Medicaid.

## Medicaid

- •23 optional services are offered.
- •In 1999, enacted 3 new laws for the following purposes:

Allows disabled workers with income above the Medicaid eligibility limits to purchase Medicaid coverage on a sliding fee scale.

Reimburses physician's fees that are covered by Medicaid at 90% of the rate established on January 1, 1999.

Authorizes Medicaid payments to nursing homes for each day a patient is absent from the facility, not to exceed 52 days per year.

•In 2000, enacted new laws for the following purposes:

Extends medical assistance coverage for family planning services to women of childbearing age with family incomes up to 185% of the FPL.

Provides for reimbursement for smoking cessation medications for pregnant women and other Medicaid eligible women that are of childbearing age.

• Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer

MISSISSIPPI

### Medicaid (continued)

(Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).

- •Extended Medicaid eligibility to children in state custody, special needs children, and individuals that would be eligible for services in a nursing home, but live in a non-institutional setting and spend 50% of their income on prescription drugs.
- Established new reimbursement rates for physicians.
- Established a Medicare Upper Payment Limit program.

## Children's Health Insurance Program: Medicaid Expansion and State-Designed Program

- •Mississippi Children's Health Program (CHIP I) provides health insurance coverage for children age 15 through 18 in families with incomes below 100% of the FPL. The program (Phase I) received HCFA approval on October 26, 1999. The benefit package is the same as the regular Medicaid program and does not include any cost sharing provisions. Phase I expects to provide coverage to 15,000 new enrollees.
- CHIP II is a state plan option and expands coverage for children/adolescents birth through 18 in families with income from 100% to 200% of the FPL. CHIP II was submitted to HCFA for approval in September 1999 and approved in December 1999. Phase II was implemented in January 2000. As of September 30, 2000, the program had enrolled an additional 13,816 individuals.

### Tobacco Settlement

- The state expects to receive approximately \$4.1 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$113 million.

The legislature passed a law that created the Health Care Trust Fund (HCTF) and the Health Care Expendable Fund. The law authorizes the legislature to appropriate funds based on annual interest earned from the Health Care Expendable Fund (the principal of the HCTF cannot be expended). For FY 2001, the legislature appropriated funds from the HCTF as follows:

\$24.9 million for Medicaid;

\$17.5 million for mental health and substance abuse services;

\$7.0 million for SCHIP;

\$6.0 million for trauma care system;

\$4.2 million for rehabilitative services;

\$4.0 million for qualified health care grants; and

\$1.4 million for maternal and child health care.

\*Information supplied by State Medicaid Agency

### Waivers

North Carolina has two Freedom of Choice Waivers, under Title XIX, Section 1915 (b), of the Social Security Act. They include:

- Carolina ACCESS I is a primary care case management program for Medicaid children under the age of 18, operating since 1991 and is operating in 100 counties as of December 31, 1998.
- Carolina ACCESS II, an expansion of ACCESS I, requires doctors, hospitals, community clinics and other providers to create networks similar to HMOs to serve the medical needs of low-income individuals. The expanded program is currently operating at seven different sites statewide.
- Carolina ACCESS III, a comprehensive full-risk program, is currently in the implementation phase. Two Carolina ACCESS I sites are receiving an additional \$2.50 per member per month to develop the program.

In addition, a number of Home and Community Based Service Waivers, Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- •Elderly and Disabled: Serves 11,500 people, operating since July 1, 1982.
- •Mental Retardation/Developmental Disabilities: Serves 4,667 people, operating since July 1, 1983.
- AIDS: Serves 45 people, operating since October 1, 1995.
- Blind and Disabled Children under age 19 (includes individuals with AIDS): Serves up to 200 people, operating since July 1, 1983.
- Implemented a mandatory HMO enrollment in one county (Macklenburg) in June 1996 via a Section 1915 (b) waiver.
- •Implemented a voluntary HMO enrollment in one county (Gaston) in October 1997 via a Section 1915 (b) waiver.

On July 1, 1994 extended managed care coverage to all children, under age 19, with family income below the poverty level.

# Managed Care

•Any Willing Provider Clause: For pharmacies only. HMO's with pharmacies located on-site are exempt. Independent pharmacies are reimbursed at the same rate as contract providers as long as they meet the requirements and standards for participation. Medicaid HMO members are exempt as pharmacy is out of the plan contract under the Medicaid contract.

# Coverage for Targeted Population

- •The Uninsured: North Carolina does not have an indigent care program.
- In December 2001, initiated the Prescription Drug Assistance Program for senior citizens with incomes below 200% of the FPL. The plan covers medications used to treat cardiovascular disease, diabetes, and chronic obstructive pulmonary disease up to \$1,000 annually.

# Cost Containment Measures

- Certificate of Need Program since 1979. Regulates introduction or expansion of new institutional health care facilities and services. Amended in 1993.
- •Rate setting. Prospective payment/per diem methodology used for Medicaid.

# **Medicaid**

•23 optional services are offered.

NORTH CAROLINA

### Medicaid (continued)

- •In 1999, the state expanded Medicaid eligibility from 12 to 24 months for Work First Families; also expanded Medicaid eligibility for the blind, disabled, and elderly up to 100% of the FPL.
- •Counties pay 15% of the non-federal share of all program costs, and 100% of the non-federal share of administrative costs.
- •In 2000, enacted legislation that directs Medicaid to apply for a demonstration waiver to provide Medicaid coverage for family planning services to men and women of childbearing age with family incomes up to 185% of the FPL.
- •In 2001, enacted legislation to control Medicaid costs as follows:

Directs the Division of Medical Assistance to develop a plan that will reduce the rate of growth in payments for medical services without reducing the rate of growth in the number of eligibles (must reduce growth rate by 8% or less of expenditures for FY 02);

Consider modifying or restructuring existing methods of reimbursement and contracting for services; and

Develop and implement a pharmacy management plan that will control growth in payments for prescription drugs.

## Children's Health Insurance Program: State Designed

- •SCHIP in North Carolina, NC Health Choice, is administered by the Division of Medicaid Assistance through a state-designed program. The plan received HCFA approval on July 14, 1998. The program provides health care coverage through a state employees equivalent plan, plus Medicaid equivalent benefits to an estimated 64,000 new enrollees.
- For families with incomes up to 150% of the FPL, there are no cost sharing obligations.
- Families with incomes between 150% and 200% of the FPL are required to pay copayments as follows:

## \$6 per prescription

\$5 per physician visit, clinic visit, dental visit, and optometry visit, except for preventive services

\$5 per outpatient hospital visit

\$20 per unnecessary emergency room use

- For families with incomes above 150% of the FPL, there will be an annual enrollment fee of \$50 per child with a maximum of \$100 for 2 or more children.
- •In 1999, the dental benefits in the plan were expanded to include: oral examinations, teeth cleaning and scaling twice during a 12-month period; full mouth x-rays once every 60 months; supplemental bitewing x-rays showing back of the teeth once every 12 months, fluoride applications twice during a 12 month period, sealants, simple extractions, therapeutic pulpotpmies, prefabricated stainless steel crowns, and routine fillings to restore diseased teeth.

### Tobacco Settlement

- The state expects to receive approximately \$4.7 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$188 million.
- •The General Assembly passed legislation in 1999 that divided tobacco settlement monies that the state is to receive over the next 25 years as follows:
- \$2.3 (50%) billion to a tobacco community foundation to provide economic assistance to tobacco dependent or economically affected communities.
- \$1.2 (25%) billion to a trust fund to benefit tobacco farmers, quota holders and those in tobacco related employment.
- \$1.2 billion (25%) to a trust fund for health services.
- For 2001, the Health Care Trust Fund Oversight Commission recommended the use of tobacco monies to establish a new pharmaceutical assistance program for the elderly and disabled.

<sup>\*</sup>Rate shown is for Medicaid payments only. The FMAP (Federal Medical Assistance Percentage) is based on the relationship between each state's per capita personal income and that of the nation as a whole for the three most recent years. Federal share of state administrative costs is usually 50 percent or 75 percent, depending on function and whether or not medical personnel are used. \*\*Federal Fiscal Years 02 and 03 reflect latest estimates reported by each state (CMS 37).

\*Information supplied by State Medicaid Agency

#### Waivers

Oklahoma has one waiver from the U.S. Department of Health & Human Services to operate a health reform demonstration under Section 1115. SoonerCare serves 121,357 current TANF-related beneficiaries and will cover an additional 84,000 SSI-related beneficiaries in the future. The program was approved October 12, 1995 and was implemented on July 1, 1996.

Several Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Serves 7,500 people, operating since July 1, 1993.
- •Mental Retardation: Serves 2,542 people, operating since July 1, 1988.
- •Mental Retardation or Related Conditions, Inappropriately Placed in Nursing Facilities: Serves 100 people, operating since August 4, 1991.
- The In-home Supports Waiver for Children: Implemented in July of 1999 to provide waiver services for additional MR clients. When fully operational expect to serve approximately 1,500 additional individuals.
- •The In-home Supports Waiver for Adults: Implemented in July of 1999 to provide waiver services for additional MR clients. When fully operational expect to serve approximately 1,500 additional individuals.

### **Managed Care**

•Any Willing Provider Clause: No

### Coverage for Targeted Population

•The state has a Medically Needy Program to provide assistance to approximately 14,000 low-income individuals who do not meet the eligibility requirements for Medicaid.

### **Cost Containment Measures**

• Certificate of Need Program since 1968. Regulates introduction or expansion of new institutional health care facilities and services.

### Medicaid

- •18 optional services are offered.
- Dropped payment for Organized Outpatient Hospital Clinic services, effective FY 1999.
- Added Lab and X-Ray payments to services for adults, effective FY 1999.
- Added payment for Diabetic Supplies for adults, effective FY 1999.

# Significant Changes in Medicaid

- Enacted legislation in 2000, known as the Oklahoma Healthcare Initiative, that increased Medicaid reimbursement to private providers as follows: 18% increase to physicians, home health care, laboratory and clinic services, ambulatory clinic, chiropractors, optometrists, psychologists, speech pathologists, and occupational therapists;
- 10% increase for behavioral health counseling services;
- 60% increase for dental services; and
- 40% increase for ambulance services.

OKLAHOMA

### Significant Changes in Medicaid (Continued)

- Increased Medicaid coverage to include children in families with incomes up to 150% of the FPL, effective June 2000 and covers approximately 240,845 individuals.
- Enacted legislation in 2001 to extend Medicaid coverage to individuals that could be eligible as a result of the federal Ticket to Work and Medicaid Buy-in legislation. The programs will provide services to individuals with disabilities that are required to enable them to gain or keep employment.
- Enacted other legislation in 2001 as follows:

Offer elective income deferral programs to physicians that maintain Medicaid contracts and provide Medicaid services;

Establish a reimbursement methodology that will enhance payments for services provided to Medicaid recipients in emergency hospitals in the rural areas; Implement a case mix reimbursement system for all state regulated long-care providers, effective November 2003 and;

Immediately provide coverage under prior authorization for any new FDA approved drug if the drug falls within a drug class that has already placed under prior authorization authority.

### Children's Health Insurance Program: Medicaid Expansion

- •CHIP in Oklahoma is called "SoonerCare". The program received HCFA approval on May 26, 1998. The program is administered by the Oklahoma Health Care Authority through an expansion of Medicaid. SoonerCare provides health care coverage to approximately 115,000 children/adolescents and eligible pregnant women.
- Phase I provides coverage for eligible pregnant women and children/adolescents birth through age 17 in families with incomes up to 185% of the FPL.
- Phase II provides coverage for eligible children/adolescents birth through age 17 in families with income between 100% and 185% of the FPL. The program received HCFA approval on March 25, 1999 and expects to cover an additional 4,915 new enrollees.
- Amended the State Medicaid plan to cover children in families with incomes between 150% and 185% of the FPL, effective June 2000 and covers approximately 34,840 individuals.

### Tobacco Settlement

- The state expects to receive approximately \$2.03 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$85 million.
- Enacted legislation in 2000 that establishes an endowment (trust fund) for health care.

50% of the tobacco settlement funds initially will be placed in the endowment, and the percentage will increase steadily to 75% by FY 08.

The board of directors for the trust will expend the interest earned for tobacco prevention, health care, education, children's services, and services for senior citizens.

For FY 01, the legislature appropriated \$36.4 million for various Medicaid programs, services and reimbursements.

### ADDITIONAL STATE HEALTH CARE INFORMATION

Sources: "Major Health Care Policies: 50 State Profiles", Health Policy Tracking Service, January, 2002; and "Medicaid Services State by State", HCFA, October 2001. \*Information supplied by State Medicaid Agency

#### Waivers

South Carolina operates a health reform demonstration with a Freedom of Choice Waiver under Title XIX, Section 1915 (b). The High Risk Channeling Project implements a case management system, including expanded screening to identify pregnant women at high medical risk. It has been operating since 1986.

Several Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Serves 7,252 people, operating since October 1, 1984.
- •AIDS: Serves 639 people, operating since October 1, 1988.
- Mental Retardation and Related Conditions: Serves 1,004 people, operating since October 1, 1991.
- Traumatic Brain Injury (including spinal cord injuries): Serves 108 people, operating since April 1, 1995.
- People Age 21 and Over Dependent on Mechanical Ventilation: Serves 25 people, operating since December 1, 1994.
- People Age 18 and Over with Amyotrophic Lateral Sclerosis: Operating since January 1, 1987.

Family Planning Waiver Expansion: The South Carolina Department of Health and Human Services submitted to HCFA an expansion proposal which would revise the existing wavier to include all women at or below 185% of the federal poverty level. These individuals would be eligible for family planning services without the requirement of having a Medicaid reimbursed pregnancy. The program was implemented in June 1997.

Medicaid Coverage of Home Care for Certain Disabled Children: Under Section 143 of the Tax Equity and Fiscal Responsibility Act of 1982, states are allowed to make Medicaid benefits available to certain disabled children ordinarily not eligible for SSI benefits because of their parents' income or resources. These children are referred to as "Katie Beckett" or TEFRA children. South Carolina began covering these children effective January 1, 1995.

# Managed Care

- Any Willing Provider Clause: For pharmacies and allied professionals.
- The South Carolina Medicaid Managed Care Program offers eligibles a choice of two voluntary managed care delivery systems: (1) The Physician Enhanced Program (PEP); and (2) The HMO Program.

# Coverage for Targeted Population

•The State does not have any indigent care programs for adults.

# Cost Containment Measures

- Certificate of Need Program since 1971. Regulates introduction or expansion of new institutional health facilities and services. Program revised in 1992.
- Rate setting. Prospective payment/Diagnostic-Related Group methodology used for Medicaid.

### Medicaid

- •19 optional services are offered.
- Counties provide \$0.50 per capita to provide Medicaid services. An additional \$13 million is assessed for use as matching funds for Medicaid, with \$7.5 million of this amount going to the Medicaid Expansion Fund.

SOUTH CAROLINA

### Medicaid (Continued)

- •Pharmacy Services: Effective July 1, 1998, Medicaid eligible recipients from birth through the month of their 21st birthday are eligible to receive an unlimited number of prescriptions per month.
- •Pharmacy Services: Effective July 1, 1999, Medicaid eligible recipients 21 years and one month old and older will be eligible to receive 4 prescriptions per month.
- Enacted legislation in 2000 that created a pharmacy assistance program, SILVERxCARD, for individuals who are 65 and older, have lived in the state for 6 months, have incomes up to 150% of the FPL, and have no other prescription drug coverage. The Legislature appropriated \$20 million in tobacco settlement funds for the program, effective January 1, 2001.
- •In August 2001, received approval from the HHS to extend Medicaid coverage to low-income, uninsured women for breast or cervical treatment.
- Appropriated funds to extend Medicaid benefits to working disabled individuals whose family income is less than 250% of the FPL and who could receive Supplemental Security Income (SSI) benefits except for their earned income.
- Appropriated funds to establish the Rehabilitative Therapy Services Fund for payment to private providers for Medicaid services to eligible children, including physical, occupational, and speech therapies and audiology services.

### Children's Health Insurance Program: Medicaid Expansion

- •The Partners for Healthy Children Program (PHC) received HCFA approval on February 18, 1998. PHC provides coverage through an expansion of Medicaid to children from birth through age 18 in families with incomes at or below 150% of the FPL. The benefit package will be the same as the regular Medicaid package.
- •PHC expanded net enrollment of children in Medicaid by over 217,681 by April 2002. SCHIP eligibles accounted for 43,971 of the net increase. There were 55,627 SCHIP recipients in the program as of June 2002.

#### **Tobacco Settlement**

- •The state expects to receive approximately \$2.4 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$96 million.
- Enacted legislation in 1998 that provides for Tobacco Settlement monies to be deposited in the State General Fund for appropriation by the General Assembly.
- Enacted legislation that created the South Carolina Tobacco Community Development Board to provide economic assistance to tobacco growers and tobacco holders in the state.
- •In 2001, the state sold the tobacco settlement funds for approximately \$765.2 million to be used for new programs as follows:
- 15% (\$118 million) of the funds for the Community Trust Fund for tobacco farmers and quota holders;
- 10% (\$78.5 million) of the funds for the Economic Development Trust Fund to upgrade water and sewer systems, and develop technology infrastructure; and 75% (\$568.7 million) of the funds were placed in the Health Care Endowment.

# ADDITIONAL STATE HEALTH CARE INFORMATION

Sources: "Major Health Care Policies: 50 State Profiles", Health Policy Tracking Service, January, 2002; and "Medicaid Services State by State", HCFA, October 2001. \*Information supplied by State Medicaid Agency

### Waivers

Tennessee operates a health care reform demonstration waiver under Title XIX, Section 1115. The waiver has been renewed through January 31, 2002. TennCare is a statewide program that provides health care benefits to Medicaid beneficiaries, uninsured state residents, and those whose medical conditions make them uninsurable. All TennCare enrollees receive services, exclusive of long-term care and Medicare costs, through capitated managed care plans that are either HMO or PPO. It limits enrollment to 1,500,000 per year with Medicaid eligibles having first priority. The capitated statewide monthly rates, effective 7/1/98, are as follows:

### Medical Capitated Rates

Less than one year of age	\$141.29
Ages 1 to 13	\$40.80
Ages 14 to 44 (male)	\$81.07
Ages 14 to 44 (female)	\$140.54
Ages 45 to 64	\$148.68
Ages 65 and over	\$167.66
Aid to Blind & Disabled	\$295.23
Medicaid/Medicare	\$92.25

A number of Home and Community Based Service Waivers, under Section 1915 (c), enable the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Two waivers serve 550, operating since July 1, 1986. Tennessee received approval in 1995 to continue this waiver.
- •Mental Retardation/Developmental Disabilities: One waiver, serving 5,982 people, operating since July 1, 1987.
- •Mental Health-Global Budget: Effective July 1, 1997, rates for seriously and persistently mentally ill (SPMI) were set at \$319.41 per member per month.

# Managed Care

- Any Willing Provider Clause: Limited to optometrists, podiatrists, and social workers.
- TennCare contracts with 10 HMO's to provide statewide coverage to all individuals enrolled in the program. Enrollment in an HMO is mandatory.
- TennCare implemented TennCare Partners to provide mental health and substance abuse services to enrollees, effective July 1, 1997.

# **Coverage for Targeted Population**

- •The TennCare Program provides managed care coverage to 844,950 Medicaid eligibles and an additional 440,050 adults and children who are either uninsurable or uninsured.
- •The entire EPSDT program for children is covered through the contract with the HMO's.

# Cost Containment Measures

• Certificate of Need Program since 1973. Regulates introduction or expansion of new institutional health facilities and services. The Health Facilities Commission, which operates the Certificate of Need Program, is scheduled to terminate on June 30, 2003.

# Cost Containment Measures (Continued)

- •Medical Care and Cost Containment Committee was appointed to oversee the medical cost containment system, including reasonable fee levels.
- •Skilled and Intermediate Care Cost is now controlled by a global budget. Reimbursement rates are set by determining the number of days of care limited to an annual funding amount.
- Passed legislation in 1998 that changed the formula for determining the need for additional nursing home beds.

### Medicaid

- •18 optional services are offered.
- •Broad based taxes on nursing homes to generate funds for the state Medicaid program.
- Amended the law in 1999 to establish procedures to verify that HMOs and BHOs participating in TennCare are delivering all health care services under the provisions the TennCare contract.
- Enacted legislation in 1999 that requires the comptroller of the treasury to appoint a TennCare prescription drug utilization review committee.
- For FY 00, the Legislature appropriated additional funds to TennCare to increase payments to Level I and II nursing home providers.
- Enacted legislation to tax nursing homes \$3,250 per licensed bed per year, effective July 1, 2000.

# Children's Health Insurance Program: State Designed

- •Tennessee submitted its CHIP plan to HCFA in January of 1998, and received approval on September 3, 1999. The plan proposes to expand TennCare to provide managed health care coverage for children/adolescents birth through age 18 in families with income up to 200% of the FPL. The program expects to provide coverage to approximately 28,000 new enrollees.
- For families with incomes up to 100% of the FPL, there are no cost sharing obligations.
- Families with incomes between 101% and 200% of the FPL are required to pay monthly premiums as follows:

101%-119%: \$24.50 120%-139%: \$32.25 140%-169%: \$47.50 170%-200%: \$70.50

### **Tobacco Settlement**

- •The state expects to receive approximately \$4.78 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$203 million.
- •For 2001, the state wanted to place the entire amount of tobacco settlement funds on hand (\$369 million) in the rainy day fund. However, a critical shortfall in revenues necessary to fund the state budget for 2001 required legislative action as follows:

\$25 million was placed in the general fund;

\$100 million was set aside for possible federal liability relative to the nursing home tax; and

\$243.8 million to carryforward to 2002 to mitigate a projected shortfall in state funding available for the Medicaid program.

<sup>•</sup>There are no deductibles for children in families with incomes between 100% and 200% of the FPL.

#### Waivers

Texas has seven waiver sites operating under the provisions of Title XIX, Section 1915 (b), of the Social Security Act as follows:

- •(1) Southeast Region: PCCM model, effective December 1, 1995; serves approximately 24,892 recipients.
- •(2) Travis County service delivery area: HMO model, effective September 1, 1996; serves approximately 32,896 recipients.
- •(3) Bexar County service delivery area: HMO and PCCM model, effective October 1, 1996; serves approximately 99,672
- •(4) Lubbock County service delivery area: HMO and PCCM model, effective October 1, 1996; serves approximately 23,955
- •(5) Tarrant County service delivery area: HMO model, effective October 1, 1996; serves approximately 57,074
- •(6) Harris County service delivery area: HMO and PCCM model, effective December 1, 1997; serves approximately 164,903 (STAR) and 55,503 (STAR+PLUS).
- •(7) Dallas service district area: HMO model, effective July 1, 1999; serves approximately 93,251
- •(8) El Paso service delivery area: HMO, PHP, and PCCM model effective December, 1999; serves approximately 72,899.
- •NorthSTAR (Behavioral Health Waiver): A Medicaid pilot project designed to create a single, seamless system of public behavioral health care in which both chemical dependency and mental health services will be provided (only for Dallas area recipients). The waiver was approved September 10, 1999.

In addition, Texas has a number of Home and Community Based Service Waivers, under Section 1915 (c), which enables the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Community Based Alternatives (CBA) program serves approximately 26,244 clients over the age of 21. Operating since September 1, 1993.
- •Mental Retardation/Developmental Disabilities and Mental Retardation-Related: Four waivers, serving approximately 6,370 clients of all ages, with the first waiver operating since September 1, 1985
- •Medically Dependent Children Under Age 21: Serves 929 people, operating since July 1, 1988.
- Developmental Disabilities: This waiver services approximately 100 clients over age 18 who are deaf-blind and have multiple disabilities.

# Managed Care

- •State of Texas Access Reform (STAR): The STAR program, the state's managed care program, serves approximately 400,000 Medicaid recipients in 6 geographic areas of the state. The state implemented Medicaid managed care in the El Paso Service Area in 1999.
- •STAR+Plus: The state's Medicaid pilot project designed to integrate delivery of acute care and long-term care services through a managed care system. The project, effective December, 1997, serves approximately 55,000 aged and disabled Medicaid recipients in the Houston area.
- •Significant Traditional Provider Requirement: All HMOs are required to make a good faith effort to include providers who have traditionally served the Medicaid population in a service district area in their provider networks.

# Coverage for Targeted Population

- •The state requires public hospitals, hospital districts and certain counties to provide care to indigents. Legislation passed in 1985, the Indigent Health Care and Treatment Act, requires those counties not fully served by a hospital district or public hospital to operate a County Indigent Care Health Program (CICHP) to provide care to their eligible indigent residents. Of the 254 counties in the state, 136 administer a CICHP.
- •In 1999, the Texas Legislature significantly amended the Indigent Health Care and Treatment Act for the first time since its enactment. Changes to the law include a focus on preventive services, a lower eligibility threshold, and a lower level at which counties may become eligible to receive state assistance funds (counties become eligible for state funds once they have spent a certain percentage of their general revenue tax levy on allowable indigent health services). The new law also

**TEXAS** 

### Tobacco Settlement

- •The state expects to receive approximately \$17.3 billion over 25 years.
- •The tobacco settlement payment is projected to be \$1.8 billion for the FY 00 and FY 01 biennium.
- Established nine separate endowments with the initial \$1.5 billion payment as follows:

\$350 million for the Higher Education Permanent Health Fund;

\$595 million for Individual Endowments to 13 medical schools;

\$45 million for the Higher Education Nursing and Allied Health Fund;

\$25 million for the Minority Health Research and Education Fund;

\$200 million for the Tobacco Education Enforcement Trust Fund;

\$100 million for the Children and Public Trust Fund;

\$100 million for the Emergency Medical Services and Trauma Care Fund;

\$50 million for the Rural Health Facility Capital Improvement Fund; and

\$25 million for the Community Hospital Capital Improvement Fund.

- A separate settlement between the state and the tobacco industry awarded \$2.28 billion over 25 years to counties, hospital districts, and other health care providers that serve the indigent population. Annual payments from the \$1.8 billion initial payment will be made beginning in FY 04.
- In 2001, the legislature appropriated tobacco settlement funds as follows:

\$204.2 million for SCHIP;

\$73.9 million for respite care;

\$61.3 for Medicaid simplification;

\$60.0 million for increasing Medicaid provider reimbursement rates;

\$17.3 million for home and community care;

\$15.3 million for SCHIP new generation of medications;

\$14.4 million for match rate change costs;

\$8.5 million for medically dependent children program waivers; and

\$7.5 million for newborn hearing and screening.

From interest earned (\$62.2 million) on previously established trust funds, the legislature appropriated the following:

\$1.13 million for minority health services;

\$9.0 million for tobacco use prevention;

\$4.5 million for children and public health;

\$4.5 million for emergency medical services and trauma care;

\$2.25 million for rural health facuility capital;

\$1.13 million for small urban hospitals;

\$15.8 million for health related higher education;

\$2.0 million for nursing allied health fund; and

26.8 million for endowment funds for higher education to 13 university health centers.

#### **Waivers**

Virginia operates two health care reform demonstrations with Freedom of Choice Waivers under Title XIX, Section 1915 (b), of the Social Security Act. They include:

- •Medallion Program, implemented in 1992, provides case management for TANF and TANF-related beneficiaries statewide. In July of 1995, this program was expanded to include the aged, blind, and disabled resident population.
- •Medallion II Program requires beneficiaries to enroll in prepaid HMO health plans. It serves 86,000 individuals and has been in operation since January 1, 1996.
- The 1998 Budget Bill authorizes the expansion of Medallion II into Richmond in the first part of 1999. Implementation of the expansion has been delayed due to the lack of HMO participation.

In addition, Virginia has a number of Home and Community Based Service Waivers, under Section 1915 (c), which enables the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Serves 8,562 people, operating since July 1, 1980.
- •Mental Retardation/Developmental Disabilities: Serves 882 people, operating since January 1, 1991.
- •AIDS: Serves 403 people, operating since July 1, 1991.
- Technology Assisted People: Serves 141 people, operating since December 1, 1988.
- Assisted Living Waiver, implemented on July 1, 1996.
- •Consumer-Directed Personal Attendant Services Waiver for the aged, blind, or disabled individuals who would be eligible for Medicaid if they were institutionalized, and have been determined to need home and community-based services to remain in the community. The program served 275 individuals in 1997 and plans to increase to 755 in 2000, implemented July 1, 1997.

# **Managed Care**

- •Any Willing Provider Clause: No.
- Freedom-of-Choice Clause: For pharmacies, as long as the providers agree to the rates and terms of participation.

VIRGINIA

### Coverage for Targeted Population

•The Uninsured: The Indigent Care Trust Fund which includes state general funds and funds provided by private acute care hospitals, subsidizes the cost of uncompensated care at the hospitals. In 1997, a resolution adopted by the legislature, requested the Joint Commission on Health Care, in cooperation with other departments, to study the provision of health care for the indigent and uninsured. Results of the study, along with recommendations for a program to provide basic health insurance to low-income, uninsured Virginia residents, was presented to the 1998 session of General Assembly. No action was taken as of September, 1999.

### **Cost Containment Measures**

- Certificate of Need (CON) Program since 1973. Regulates introduction or expansion of new institutional health facilities and services. Nursing home moratorium which had been extended until June 30, 1996 was allowed to expire. The state implemented a new program whereby the department requests proposals for new nursing home beds based on need in each health planning district.
- •Legislation passed in 1998 added certain medical equipment to the CON review process and exempted the replacement or upgrade of existing MRI systems from CON requirements.
- Enacted legislation in 2000 that calls for the elimination of the program by July 1, 2004.
- •Rate setting. Prospective payment/per diem methodology used for Medicaid.

#### Medicaid

- •21 optional services are offered.
- Counties pay 20% of the non-federal share of administrative costs related to eligibility determinations.
- Enacted legislation in 1999 directing the Department of Medical Assistance to develop and implement a program to enroll children birth and age 3 for services under the Federal Individuals with Disabilities Education Act.
- Enacted legislation in 2000 that provides for the following:

Requires Medicaid to provide special food products for the management of phenylketonuria to the parents or guardian of any child or pregnant woman; Requires Coverage for colorectal cancer screening;

Requires coverage for high-dose chemotherapy and bone marrow transplants on behalf of eligible individuals over age 21 that have been diagnosed with myeloma, leukemia, or a diagnosed condition for which high-dose chemotherapy and bone marrow transplant is the appropriate treatment; and Requires the Medicaid program to issue standardized prescription benefit cards.

- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).
- Enacted legislation to extend Medicaid coverage to individuals that could be eligible as a result of the federal Ticket to Work and Medicaid Buy-in legislation. The programs will provide services to individuals with disabilities that are required to enable them to gain or keep employment.

# Children's Health Insurance Program: State Designed

- •CHIP in Virginia received HCFA approval on October 22, 1998 and is administered by the Department of Medical Assistance Services through a state-designed program. The state plan is titled "The Virginia Children's Medical Security Insurance Plan (VCMSIP)". The program will provide health care coverage through a state employees equivalent plan to an estimated 23,900 currently eligible children and 32,800 projected new enrollees. Children/adolescents, birth through age 18, in families with income up to 185% of the FPL are eligible for VCMSIP benefits.
- For 2000, expanded the SCHIP program to provide health care coverage to individuals up to age 19 in families with incomes to 200% of the FPL, still pending HCF

VIRGINIA

### **Tobacco Settlement**

- The state expects to receive approximately \$4.1 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$167 million
- •The planned use of the funds is as follows:
- Enacted legislation in 1999 that created three trust funds and provided for deposit of monies as follows:

50% to the Tobacco Indemnification and Revitalization Trust Fund to indemnify tobacco growers from the adverse effects of the tobacco settlement and to revitalize tobacco dependent communities;

10% to the Tobacco Prevention Trust Fund, to be administered by the Virginia Tobacco Settlement Foundation; and 40% for discretionary appropriation by the legislature to other state programs.

• For 2001, the state did not commit tobacco settlement revenues to any specific purpose as the legislature rejected a proposal to securitize the tobacco settlement.

\*Information supplied by State Medicaid Agency

#### Waivers

West Virginia has a Freedom of Choice Waiver, under Title XIX, Section 1915 (b), of the Social Security Act. The West Virginia Physician Assured Access System implements a primary care case management program for TANF and TANF-related Medicaid beneficiaries.

HCFA approved a 1915(b) waiver to implement Medicaid managed care in 12 counties for acute care health services, effective July of 1999.

A total of 46,000 TANF recipients are enrolled in the 23 counties with managed care programs. Enrollment of SSI recipients has been delayed indefinitely.

In addition, West Virginia has several Home and Community Based Service Waivers, under Section 1915 (c), which enables the state to provide long-term care services to people who otherwise would require institutionalization. They include:

- Elderly and Disabled: Serves 4,420 people, operating since July 1, 1985.
- Mental Retardation/Developmental Disabilities: Serves 2,320 people, operating since July 1, 1985.

### **Managed Care**

• Any Willing Provider Clause: No

# **Coverage for Targeted Population**

•The Uninsured: The State pays a limited amount of disproportionate share payments to hospitals providing indigent care.

### **Cost Containment Measures**

- Certificate of Need Program since 1977. Regulates introduction or expansion of new institutional health facilities and services. The program was due to sunset in 1996. However, it was extended pending completion of a study of the entire CON program.
- •Rate setting. Retrospective payment methodology used for Medicaid.
- •West Virginia changed Inpatient Hospital Services reimbursement from Medicare Cost Principal to a Prospective Payment System using DRG's effective January 1, 1996.
- Enacted legislation in 1999 to begin an incremental reduction in the scope of the state's CON program.

#### Medicaid

- •24 optional services are offered.
- In 1998, implemented a new reporting system to comply with HCFA requirements for electronic transmission of HCFA 2082.
- Enacted legislation in 2001 that requires Medicaid to provide coverage to women that have been screened and diagnosed with breast or cervical cancer (Federally mandated by the Breast and Cervical Cancer Prevention and Treatment Act of 2000).
- Enacted legislation to extend Medicaid coverage to individuals that could be eligible as a result of the federal Ticket to Work and Medicaid Buy-in legislation. The programs will provide services to individuals with disabilities that are required to enable them to gain or keep employment.

WEST VIRGINIA

# Children's Health Insurance Program: Medicaid Expansion

- •West Virginia's Children's Health Insurance Program received HCFA approval on September 15, 1998. The CHIP program provides health care coverage for children age 1 to 6 in families with incomes up to 150% of the FPL. Phase II of the program, which includes all children/adolescents under age 19 in families with income up to 150% of the FPL, received HCFA approval on April 1, 1999. As of August 2000, there were 21,500 individuals enrolled in the program.
- CHIP expansion ended 09/30/00. The CHIP program took over this population as of 10/01/00.
- •In 2000, HCFA approved a state plan amendment that raised the family income limit to 200% of the FPL and authorized copayments on families with incomes from 150% to 200% of the FPL.
- The program does not charge co-payments for preventive, dental, or vision services. However, co-payments are charged for non-preventive services as follows:

Service	Co-Pay	
Non-well Visit	\$15	
Inpatient Visit	\$25	
Outpatient Service	<b>\$2</b> 5	
Emergency Room Visit	\$35	Waived if admitted
Prescription	\$5	Generic
	\$10	Brand Name

The annual co-pay maximum is \$250 per child, up to \$750 for three or more children.

#### Tobacco Settlement

- •The state expects to receive approximately \$1.74 billion over 25 years.
- For Fiscal Year 2000, the tobacco settlement payment was approximately \$61 million.
- Enacted legislation in 1999 that created two funds to receive monies from the Tobacco Settlement: 1) the West Virginia Medical Trust Fund Endowment to educate, reduce, and stop tobacco use; and 2) the West Virginia Tobacco Settlement Fund to be used for Medicaid, public health, and state facilities.
- •In 2000, the legislature appropriated \$5.9 million from the Medical Trust Fund for tobacco prevention and \$52 million from the tobacco settlement fund—\$5 million for the state employees insurance and \$47 million for the state's mental health hospital.
- •In 2001, the legislature appropriated tobacco settlement revenues according to the plan that was adopted in 1999.

# **DEFINITIONS**

AFDC: Includes recipients of Aid to Families with Dependent Children and all related categories, unless otherwise specified.

Any Willing Provider Clause: Provision compelling insurers to sign on any provider who agrees to abide by the same terms of the contract and to accept the same payment scheme as those providers currently in the managed care organization.

Capitation: A reimbursement system in which health care providers receive a fixed fee for every patient served, regardless of how many or how few services the patient uses.

Case Management: A technique used by third party payors and self-insured employers to monitor or coordinate treatment for specific diagnosis, particularly those involving high-cost or expensive services.

Certificate of Need (CON): State programs that regulate expenditures for the introduction or expansion of health facilities, institutional health services, and/or the purchase of major medical equipment.

Diagnostic-Related Group (DRG): This is a system in which the hospital receives a fixed fee for each type of medical procedure regardless of the hospital's cost of providing that service.

Fee-for-Service: The traditional way of billing for health care services. There is a separate charge for each patient visit and service provided.

Full Risk Plan: Medicaid enrollees must receive care from a provider who belongs to a participating HMO. Under this plan, if the cost of care rises above the stated capitation rate, the managed care organization or its doctors absorb the cost of care.

Gatekeeper: A component of an independent practice association HMO that requires its subscribers to see a primary physician before seeing a specialist.

Group Practice Association HMO: Type of HMO consisting of three or more physicians who formally align to provide health care to a group based on a pre-negotiated period for a fixed, prepaid rate.

The Centers for Medicare and Medicaid Services (CMS-- formerly HCFA): A federal agency within the Department of Health and Human Services. It was created in 1977 to administer the Medicare and Medicaid programs -- two national health care programs with more that 72 million beneficiaries. While CMS mainly acts as a purchaser of health care services for the Medicare and Medicaid beneficiaries, it also:

- Assures that Medicare and Medicaid are properly administered by its contractors and state agencies;
- Establishes policies for the reimbursement of health care providers;
- Conducts research on the effectiveness of various methods of health care management, treatment, and financing; and
- Assesses the quality of health care facilities and services.

Health Insuring Organization (HIO): An entity that either provides for or arranges for the provision of care and contracts on a prepaid capitated risk basis to provide a comprehensive set of services.

Health Maintenance Organization/Federally Qualified (HMO/FQ): A public or private organization that contracts on a prepaid capitated risk basis to provide a comprehensive set of services and is federally qualified.

Health Maintenance Organization/State Plan Defined (HMO/SPD): A public or private organization that contracts on a prepaid capitated risk basis to provide a comprehensive set of services and is a state defined plan.

Limited Risk Plan: A managed care plan in which the state contracts directly with providers on a per patient basis for certain services, but continues to pay on the fee-for-service for all other care. The state shares the financial risk of providing medical services with the managed care organization.

Managed Care Organization (MCO): A system of care under which a predetermined number of patients are enrolled, for a pre-determined rate for all or part of their care. The most common categories are health maintenance organizations and primary care case management.

Management Service Organization: An organization formed by one or more physician groups to manage their medical practices.

Medicaid Managed Care: A system of care in which a state has moved all or part of its Medicaid recipients into a managed care system. The most common categories are health maintenance organizations and primary care case management.

Medicaid: A national entitlement program funded by the federal government and operated by the individual states. It is designed to provide medical coverage for the poor and specific groups of uninsured.

Medical Saving Accounts: Individual and/or family health funds similar to individual retirement accounts into which employers and employees make tax-deferred contributions.

Network-Model HMO: An HMO that contracts with more than one independent multi-specialty group practice.

Open-Ended HMO: This type of HMO is similar to the traditional HMO. Its advantage is that the user is provided coverage for numerous procedures performed outside the HMO. A traditional HMO requires members to stay within the network for services. The point-of service (POS) plan is an example of an open-ended HMO.

Open Enrollment: One period of time each year when HMOs are required to take applications regardless of the applicants' pre-existing conditions.

Personal Responsibility and Work Opportunity Act of 1996: The recent Welfare Reform Bill signed into law. It provides for sweeping changes in the current welfare system, including the severing of the automatic link between AFDC benefits and Medicaid eligibility.

Physicians Enhanced Program (PEP): The PEP is a voluntary program that links Medicaid recipients to a primary care provider (PCP). The PCP will provide a basic set of services for recipients in their practice and be compensated at the end of each month based on the number of PEP members enrolled in the practice, according to their age, gender, and category of eligibility.

Point-of-Service (POS): A POS plan covers the health care services provided to members who use the network. It is similar to an HMO in that it utilizes a primary care "gatekeeper".

Preferred Provider Organization (PPO): Type of health insurance program in which a group of doctors and hospitals provide a broad range of medical care to a predetermined group of subscribers for a predetermined fee. Under this plan, a third party negotiates discounted rates for services with specific providers. Its members, however, may use providers outside the network but are encouraged by financial incentives to seek care from within the network.

Prepaid Health Plan (PHP): An entity that either contracts on a prepaid, capitated risk basis to provide services that are not risk-comprehensive, or contracts on a non-risk basis. Additionally, some entities that are defined as HMOs are treated as PHPs through statutory exemption.

Primary Care Case Management (PCCM): Programs that use a provider who receives a small fee to manage the individual's care but reimburses on a fee-for-service basis. The primary care case manager is responsible for health care utilization and access to service. This is a freedom of choice waiver program which can be authorized by the authority of Section 1915(b) of the Social Security Act. States contract directly with primary care providers who agree to be responsible for the provision and/or coordination of medical services to Medicaid recipients under their care.

Provider Taxes: Broad-based taxes on facilities, such as hospitals or nursing homes; and services such as pharmaceutical services which are used to generate state Medicaid funds.

Section 1915(b) Waivers: Provision of the Social Security Act that allows states to waive certain programmatic rules governing Medicaid. It is typically used in implementing managed care to implement provider choices. States have generally used one of the following two approaches; capitated or primary care management programs.

Section 1115 Waivers: Provision of the Social Security Act that allows states, subject to HCFA approval, to waive certain requirements of the Medicaid program, such as eligibility rules. These waivers can be used to create small-scale demonstration projects in order to test proposed broad changes in the Medicaid program.

SSI: Includes Supplemental Security Income recipients (or aged, blind and disabled individuals in those states which apply more restrictive eligibility requirements).

T19: All mandatory eligibility groups, as described by Title XIX of the Social Security Act.

Utilization Review: Involves medical professionals who are outside the managed care organization reviewing and evaluating the activities and diagnoses of the individuals within the organization.
